Latitude 32.726192 Longitude -103.761283

#### NATURE OF RELEASE

Type of Release: Oil/ Produced Water	Volume of Release: Unknown	Volume Recovered: 500 bbls (Oil)/ 0 bbls (PW)
Source of Release: Flow Line	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 5-15-14 1:00 pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Geoff Leking, Jim Amos	
By Whom? Zack Thomas	Date and Hour 5-15-14 5:00 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Failure of a poly flow line resulted in the release of an unknown volume of a mixture of crude oil and produced water. Following the discovery of the release, the well was shut in and the flow line was repaired. A vacuum truck was used to recover approximately 500 bbls of free standing fluid.

Describe Area Affected and Cleanup Action Taken.\*

The release impacted an area of pasture land measuring approximately 5,500 sq. ft. Saturated soil will be scrapped up and placed on a poly liner pending BLM Arch and One-Call clearance. The release occurred adjacent to two historical releases which will be remediated in the same manner. Final remediation will be conducted in accordance with the NMOCD's Guidelines for Remediation of Spills, Leaks and Releases.

Remediation activities conducted at the QPQASU #10 Flow Line release site met the objectives set forth by the NMOCD. Approximately 10,360 yds of impacted material was excavated from the release site and hauled to an NMOCD approved disposal facility. A 20-mil poly liner was placed atop soils exhibiting concentrations of BTEX, TPH and/or chloride above NMOCD regulatory standards. Please reference the *Remediation Summary and Risk-Based Site Closure Request*, dated January 2015, for details of remediation activities and the results of confirmation soil samples.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
