Mike and Terry,

Tetra Tech has scheduled the soil remediation on the sites listed above. The Jenkins Federal B #12 is tentatively scheduled for Friday (3-11-11) and the remediation could take one day to complete. Prior to backfilling, we will notify to inspect of the excavations. The Spruce Federal #1 Tank Battery and the Berry A Federal #1 will start on Monday (3-14-11) and will also notify you during each phase of the remediation project. The JR Horz will be performed after the Berry A Federal is completed. We will call if the scheduled changes or call me if your in the area. Let me know if you need additional information, thanks
