Latitude 32.8188881725711 Longitude -103.905195940205

### NATURE OF RELEASE

Type of Release Produced water	Volume of Release 60 bbls	Volume Recovered 45 bbls
Source of Release Steel Pipeline	Date and Hour of Occurrence 8/23/12 10:00 am	Date and Hour of Discovery 8/23/12 10:30 am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? M. Bratcher - NMOCD; Terry Gregston - BLM	
By Whom? Joe Hernandez	Date and Hour 8/23/12 12:00 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

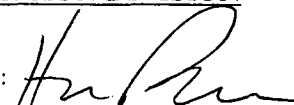

Linn arrived at battery and found water inside the dike. The water dump line was corroded going into the tanks and dumped water out of the hole into the dike.

Describe Area Affected and Cleanup Action Taken.\*

A 45' x 45' area was affected inside the diked area. The site was excavated to 1 - 2.5 ft bgs under the supervision of E-Tech Environmental (E-Tech). On October 16<sup>th</sup>, 2012, BLM stated that per BLM's conversation with E-Tech, it was determined that further excavation may compromise the integrity of standing equipment on site and/or prove to be a safety hazard. BLM requested that confirmation samples be pulled and sent to a lab. On October 17<sup>th</sup>, 2012, E-Tech took final samples of the site and sent them to a commercial laboratory for analysis. This final data was sent to BLM on November 7<sup>th</sup>, 2012 with a request to backfill the site. BLM responded on November 24<sup>th</sup>, 2012 that the soil samples above closure levels are in proximity to standing equipment. BLM approved closure of the excavation and required full mitigation of the contaminants at the abandonment of the location. The site was backfilled with clean, imported caliche.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
