Describe Cause of Problem and Remedial Action Taken.*

On April 16, 2014 at 10:30 AM fluid was noticed misting out of the flow line in the vicinity of the TNT 6 Fed Com 1, upon arrival it was discovered that the flow line possibly had a weak spot which resulted in a 3 inch by 1.5 inch slit that released an estimated .5bbl of mixed oil and produced water into pasture.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately a 100x100 area in the pasture located northwest of the lease road leaving the TNT 6 Fed Com 1. 0bbls were recovered and the area will be raked and the surrounding vegetation will be pressure washed with Dawn soap.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
