Re: Lost Tank 33 Federal #10, 33-21S-31E, API: 30-015-29744, Eddy County, New Mexico, 2RP-121.

Sherry:

Thank you for your time this afternoon. As we discussed, this email is to clarify the proposed soil remediation to be performed at the Lost Tank 33 #10 site in Eddy County, New Mexico.

The soils in the vicinity of AH-5 with TPH in excess of the RRAL and elevated chloride concentrations will be removed and evaluated for disposal. The remainder of the excavated soils will be placed into 75-100 yd³ stockpiles for composite sampling. Stockpiles below the RRAL will be placed back into the excavation. Stockpiles above the RRAL will be periodically rolled to aerate the soils. Once the RRAL are achieved, the soils will be placed back into the excavation.

The work is anticipated to begin on Monday, April 28, 2008.

Additionally, I would like to notify you of sampling to be performed on the DiMaggio #1 Tank Battery located in Section 16, T-26-S, R-29-E as per the approved work plan. The sampling will be performed on Thursday, April 24, 2008.

Thank you for your help in these matters.
