Subject: Re: Archaeological Check

Bob,

The north/south lease road and associated pipeline ROW appears to have arch clearance extending roughly 210' to the east of the lease road. With that it looks to be clear for going ahead and removing the contaminants. If any questions, please get back to me as Duncan is out until after the new year.

Thanks,

Jim,

Yates had a minor release (3 B/O and 10 B/PW) from the Creek AL Federal #12 flow line, north of the pumping unit (east side of the lease road). I would like to request an archaeological check for the following GPS coordinates.

N32.72482

N103.93022

The release area is approximately 15' x 30' and extends approximately 40' to the east of the lease road. I will have a contractor get a one call made and wait for BLM clearance before soils are excavated.

Thank you.
