NM OIL CONSERVATION  
ARTESIA DISTRICT

AUG 3 2015

RECEIVED

**If a Watercourse was Impacted, Describe Fully.\***

**Describe Cause of Problem and Remedial Action Taken.\***

Static electricity caused a water tank to explode due to bad lightning storm during the early morning hours. When lease operator drove up to location and noticed the incident he shut in well and did a lock out tag out. 90 BBLS of produced water was released into lined containment.

**Describe Area Affected and Cleanup Action Taken.\***

90 BBLS of produced water was released in a 27 x 68 lined containment. All 90 BBLS were recovered and lining was checked for holes and no holes found.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
