Application for Non-Standard Well Location  
Case LS 9M  
W/2 Section 8-T31N-R11W  
Basin Dakota & Blanco Mesaverde  
San Juan County, New Mexico

BP America Production Company respectfully requests an administrative approval for a non-standard well location for the Case LS 9M to be drilled at a location of 535' FNL and 1030' FWL of Section 8, T31N-R11W. The non-standard prospect is staked on an abandoned Pictured Cliffs location. The NSL is necessitated by topographical conditions with steep terrain - and would insure the conservation of surface and subsurface resources in the area. This location was staked non-standard for the Dakota & Mesaverde formations in order to best fit the existing terrain and maintain footage away from the edge of the cliff to avoid any adverse impact.

To aid in your review attached is a C-102 and a 9 Section well Location plat, indicating the proposed well location and the existing Dakota & Mesaverde wells in the area. Also attached is a topographical map.

Your attention to this matter is greatly appreciated. Should you have any questions concerning this application please do not hesitate to call me at 281-366-4081.

Sincerely,

Cherry Hlava
