Jennifer

I spoke with Mike Bratcher on March 6, 2013 and presented him attached clousure plan regarding this project. It is his opinion from the OCD's view we can close this site, as is, due to the fact all contaminants related to the spill have been addressed and are well below closure guidelines. With this being said COPC needs your thoughts on closing this site, or what further work needs to be done to satisfy the BLM. If further information is needed, please feel free to give me a call. Thanks for your time.

Attached for your review is the analytical and a sketch of the spill area at the James E Upper Battery. If you have any questions please feel free to give me a call. Ninety percent of the spill is in what I believe to be the old reserve pit area. I will give you a call tomorrow to follow up.

Thank You
Justin Roberts
