NATURE OF RELEASE

Type of Release: Produced water	Volume of Release: ~160 bbls	Volume Recovered: ~110 bbls
Source of Release: Tank Battery	Date and Hour of Occurrence: May 9, 2013 A.M.	Date and Hour of Discovery: May 9, 2013 A.M.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher, NMOCD	
By Whom? Bradley Blevins	Date and Hour: May 10, 2013 @ 1430 hrs	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse: Not Applicable	
If a Watercourse was Impacted, Describe Fully.* Not Applicable		

Depth to water? ~390 ft

Describe Cause of Problem and Remedial Action Taken.* The release of approximately 160 barrels of produced water was the result of a lightning strike on a water tank; all fluid remained inside the firewall. A vacuum truck was utilized to recover any free liquids. An Emergency Response Team arrived at the release area and began continuous abatement of the impacted area.

Describe Area Affected and Cleanup Action Taken.* Approximately 10,800 square feet of surface area within the confines of the berm was impacted by the release. Approximately 110 barrels of produced water was recovered from the site. Visibly stained soil was excavated and hauled away for disposal at a state approved facility. Soil samples were collected and submitted to Cardinal Laboratories for testing. Having received acceptable results and NMOCD approval, the affected area has been backfilled, and returned to proper conditions.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
