Dear Mr. Bratcher,

As per our meeting on 9/19/2012, the work plan as submitted to the NMOCD for the correction on Cimarex Energy Co. Neste Williams Federal No.2 release is verbally approved. The NMOCD verbal approval for the work plan included attached stipulation which will require the impacted area located with-in the bermed area of the tank battery to be excavated to 4-feet below ground surface, addition vertical delineation will be required below 4-feet below ground surface for BTEX. If further information is required please contact me.

Mike,

Due to increasing and elevated BTEX levels at the 4' sample interval (BTEX @ 304 mg/kg), OCD requests further delineation for these constituents. In addition, OCD requests samples be obtained from more than one sample point, if practicable.

If you have any questions or concerns, please contact me.
