Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

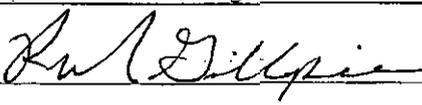

The tank battery had hydrocarbon-impacted soils on location which were historical in nature. A remediation plan was generated to alleviate the problem.

Describe Area Affected and Cleanup Action Taken.*

The affected area was approximately 200' x 60'. Remediation was completed in accordance with the remediation plan approved by Geoffrey Leking of NMOCD via email on 1/25/2013. All impacted soils were disposed of at a NMOCD-approved disposal facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: RE: Hess-Former Hess AHC State V & F Battery
Date: Friday, January 25, 2013 3:01:48 PM MT
From: Leking, Geoffrey R, EMNRD
To: Cliff P. Brunson
CC: Ken Swinney

Cliff

This email supersedes my email of earlier today. Due to our telephone conversation this afternoon that indicates that excavation to 12 feet would be problematic due to the high amount of rock in the soil, the following is agreed to:

- 1) Excavate to 1' across the site.
- 2) Excavate to 7' at SB-2 (SP2) and SB-3 (SP3).
- 3) Emplace liner at 7' in the excavation at SB-2 (SP2).
- 4) Backfill.

Please contact me if you have any questions. Thank you.

Geoff,

The e-mail below is the one that I was referring to this afternoon that I never received a written approval response from you. If you would please reply back with your concurrence on this plan, it would be greatly appreciated. We have completed the excavation and are ready to backfill.

Thanks, Cliff

Subject: Hess-Former Hess AHC State V & F Battery

Geoff,

This e-mail is to confirm our discussion on September 5, 2012 concerning the remediation plan for the historical impact existing at the Former Hess AHC State V & F Battery. As agreed, Hess will excavate 2 feet in the areas covered by SB1 and SB4. In the area covered by SB3, the excavation will be 3 feet in depth and in the area covered by SB2, the excavation will be 5 feet. All of these areas are depicted on the attached site diagram. The excavation will then be backfilled with clean soil.

I have attached the site drawing and the summary of the laboratory data we reviewed during our discussion for your files. If you would please reply back via e-mail with your concurrence of this remediation plan, it would be greatly appreciated. We can then schedule this site for remediation activities.

Hess and I thank you for your assistance in handling this matter.

Thanks, Cliff
