Latitude 32.002158 Longitude -103.973977

NATURE OF RELEASE

Type of Release: Condensate	Volume of Release: Unknown	Volume Recovered: 0
Source of Release: Truck	Date and Hour of Occurrence: 1/10/2015	Date and Hour of Discovery: 1/10/2015
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* On January 10, 2015 a vacuum truck driver attempted to load condensate into the regency pipeline. The driver attached the hose to the wrong valve and sprayed condensate in an approximate 200-foot radius. Subsequent precipitation events in the area caused the fluid to flow down gradient across a Kinder Morgan Right-of-Way (ROW) and into a draw in the direction of the Pecos River. The fluid did NOT reach the river.

Describe Area Affected and Cleanup Action Taken.* Talon was contacted to conduct an emergency response and to contain the release. Oil sorbent booms were placed in the draw at the end of the flow path in the draw, at an additional location further down the draw and around the sumps on location to insure containment should a large precipitation event occur. The heavily impacted material on the upper launcher location (including the soil on Kinder Morgan's ROW) was scraped up and stockpiled. The stockpiled soil was covered in plastic and berms were constructed around the stockpile to insure nothing would run-off. A vacuum truck was then dispatched to recover the free standing fluid in the sumps. Talon conducted soil sampling within the impacted area and drafted a remediation work plan that was subsequently approved by NMOCD and BLM. The remediation at this site was conducted in accordance with the approved work plan and all stipulations made by NMOCD and BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
