Report Description

This report shows an AE Order Number in Barcode format for purposes of scanning. The Barcode format is Code 39.

App Number: pCOH0808037053

1RP - 1818

SOUTHERN UNION GAS COMPANY

Basin Environmental Service Technologies, LLC

Environmental Site Summary

Project Name: Drip Tank #61-62 (NMOCD 1RP#-1818)

GPS Coordinates: 32 21.198' N 103 15.387' W

Legal Description: Unit Letter: D Section: 34 Township: 22S Range: 36E

Depth to Ground Water: ~350'

Land Owner: Wanda Jones

Address: 3464 Alicia Court, Midland, TX, 79707

Approximate Date of Release: N/A

Approximate Volume of Release: N/A

Type of Release: Below Grade Tank

Background Information: The Drip Tank #61-62 Remediation Site is a result of a failure in a former 100 bbl Below Grade Tank (BGT).

A Form C-144 was filed in March 2008, with the NMOCD Hobbs District Office, notifying the NMOCD of Southern Union Gas Services' intentions of removing the tank and remediating the immediate area. During the removal of the BGT, a historical "Pit" was discovered in the vicinity. Southern Union has selected the Drip Tank #61-62 for immediate remediation.

Summary of Field Activities: The BGT at the Drip Tank #61-62 was removed in March 2008. In October 2012, the site was revisited in an effort to determine if any contaminants were left in place. During the investigation, four test trenches were advanced to determine the vertical and horizontal extent of soil impact. While the horizontal extent of impact was able to be determined, field tests indicate elevated concentrations of chloride exists at 15' below ground surface (bgs). It was determined that the advancement of one or more soil borings would be required to determine the vertical extent of soil impact.

Purpose of Soil Boring/Monitor Well Installation: As per the NMOCD's Guidelines for Remediation of Spills, Leaks and Releases, the vertical extent of soil impact and the status of the groundwater must be determined before developing a remediation strategy and advancing the site toward closure. It was determined that the advancement of one or more soil borings would be required to determine the vertical extent of soil impact. If during the advancement of the proposed soil boring it is determined that groundwater may have been impacted, the affected soil boring(s) may be converted into a 2" monitor well to facilitate groundwater sampling and remediation.

Proposed Soil Boring/Monitor Well Locations:

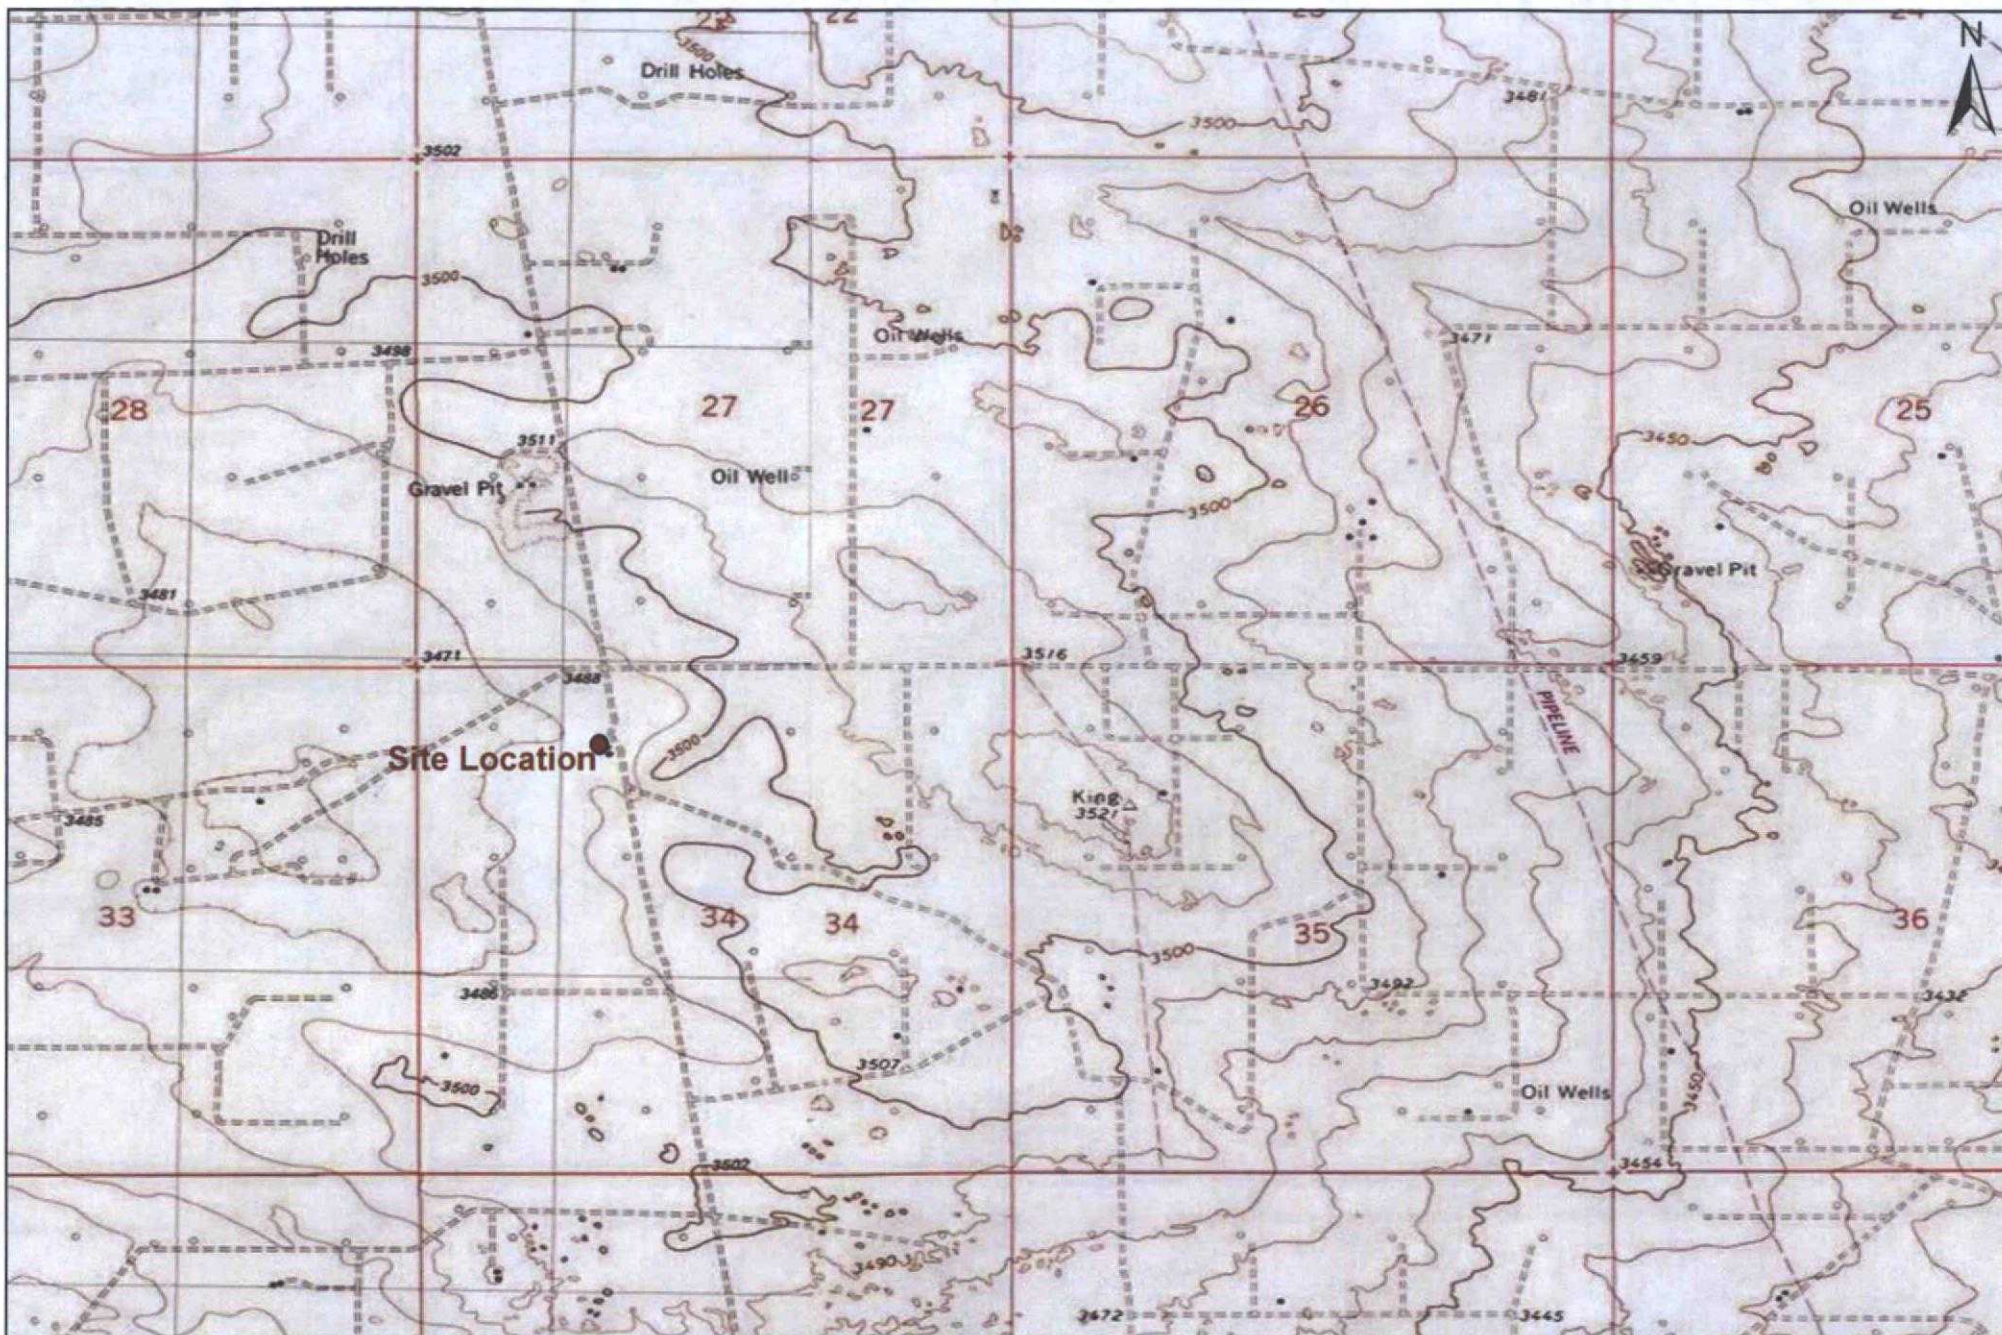

Description:

<u>~32.353394</u>	<u>N</u>	<u>~103.256439</u>	<u>W</u>
