Mr. Goetze,

The subject saltwater disposal well was recently worked on to repair a hole in the tubing. Additionally, injection tubing was downsized from 4-1/2" to 3-1/2", 9.3# 8rd EUE IPC w/ TK 70-XT coating. The new 9-5/8" packer depth is 5,306' MD.

EOG Resources requests an exception for the packer setting depth requirement. The current packer is set at 5306', 118 ft. above the top injection perforation at 5424'.

If additional information is needed, please contact me at 432-686-3689.

Sincerely,

EOG RESOURCES, INC.
