Describe Cause of Problem and Remedial Action Taken.*

A water transfer road crossing line was damaged by possible malicious mischief causing an 8 barrel spill of treated water on the lease road approximately 3220 feet to the north of the Cotton Draw Unit 238H. Line pinchers were applied to both the upstream and downstream lines to isolate the leak and the damaged line and left flange were replaced.

Describe Area Affected and Cleanup Action Taken.*

8 barrels of treated water were spilled on the lease road and 0 barrels were recovered. The spill ran in a southwest direction covering an approximate 40 foot by 40 foot area. The contaminated soil was placed on a plastic liner to prevent further leakage. An environmental company will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
