RE: Hydrostatic Test Dewatering Discharge Permit Renewal
DCP Midstream, LP
Discharge Permit Number HBP-015

Dear Mr. Jones:

In accordance with New Mexico Water Quality Control Commission (WQCC) Regulations, DCP Midstream, LP (DCP) requests that the New Mexico Oil Conservation Division (OCD) renew Hydrostatic Test Dewatering Discharge Permit HBP-015 for DCP's New Mexico operations. As required by NMAC 20.6.2.3114, a check for the \$100 permit application filing fee and \$150 temporary permission fee was submitted to your office on October 31, 2016. A check in the amount of \$250.00 has been mailed to the NM Oil Conservation Division.

DCP performs hydrostatic testing of new pipelines with a volume per test that will not exceed 25,000 gallons. In accordance with OCD *Guidelines for Hydrostatic Test Dewatering (Revised 1/07)*, DCP will meet the following conditions for the hydrostatic test waste water discharged under this permit:

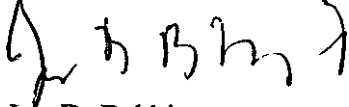

- a. The volume per test will not exceed 25,000 gallons.
- b. Fresh water from a public/municipal water supply system or other OCD approved source will be used for each test.
- c. Written or e-mail notification will be provided to the OCD 72 hours prior to each hydrostatic discharge event.
- d. The discharge will not enter any lake, perennial stream, river, or their respective tributaries that may be seasonal.
- e. No discharge will occur:
 - i. where groundwater is less than 10 feet below ground surface;
 - ii. within 200 feet of a watercourse, lake bed, sinkhole, or playa lake;
 - iii. within an existing well head protected area;
 - iv. within, or within 500 feet of a wetland; or

- v. within 500 feet from the nearest permanent residence, school, hospital, institution or church.
- f. Best management practices must be implemented to contain the discharge onsite, so that the discharge does not impact adjacent property, and to control erosion.
- g. The discharge will not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsection A, B, and C of the New Mexico Water Quality Control Commission Regulations (20.6.2.3103 NMAC).
- h. Any unauthorized discharges, spills, leaks and releases of hydrostatic test water will be reported and corrective action taken pursuant to OCD Rule 19.15.29 NMAC.
- i. The landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location will be properly notified of the activities prior to each proposed hydrostatic test event.
- j. An annual report summarizing all tests of new pipe using less than 25,000 gallons per test will be submitted to the OCD within 45 days of the temporary permission expiration date. The report will contain the following information for each test:
 - i. Location of the hydrostatic test (including Section, Township and Range or GPS coordinates);
 - ii. Date of the test;
 - iii. Volume of the discharge; and
 - iv. Source and quality of the test water.

If you have questions or require additional information please call me at (432) 620-4207.

Sincerely,

DCP Midstream, LP
