New Mexico Oil Conservation Division  
Attention: Mr. Leonard Lowe  
1220 South Saint Francis Drive  
Santa Fe, New Mexico 87505

Re: Application for Unorthodox Well Location  
White Falcon 16 State Com #12H

SHL: 226' FNL 852' FWL (Unit D), Section 16-T25S-R35E  
Proposed First Perf: 330' FNL 1270' FWL, Sec. 16-T25S-R35E  
BHL: 200' FSL 1270' FWL (Unit M), Section 21-T25S-R35E  
Proposed Last Perf: 330' FSL 1270' FWL, Sec. 21-T25S-R35E  
Lea County, New Mexico

Dear Mr. Lowe:

Pursuant to Division Rule 19.15.15.13, COG Production LLC (COG) respectfully requests administrative approval of an unorthodox oil well location for its White Falcon 16 State Com #12H well. The producing interval of this well does not meet the producing area requirement of 330' from the outer boundary. Attached is Form C-102 showing the project/producing area of this well.

COG is seeking approval for the unorthodox location in order to maximize recovery of reserves. The New Mexico Oil Conservation Division's approval of the unorthodox completed interval for the White Falcon 16 State Com #12H well will allow for efficient recovery of reserves, thereby preventing waste and improving well performance.

The affected offset tracts are as follows:

Tract 1 (SE/4SW/4 Sec. 9) – EOG A Resources, Inc., EOG M Resources, Inc., EOG Y Resources, Inc.  
Tract 2 (E/2W/2 Sec. 16) – EOG A Resources, Inc., EOG M Resources, Inc., EOG Y Resources, Inc.,  
V-F Petroleum, Inc.  
Tract 3 (E/2NW/4 Sec. 21) – Apache Corporation, Chisos, Ltd., COG Acreage LP, COG Operating LLC  
Tract 4 (NE/4SW/4 Sec. 21) – COG Operating LLC  
Tract 5 (SES/4SW/4 Sec. 21) – COG Operating LLC  
Tract 6 (NE/4NW/4 Sec. 28) – Chevron USA, Inc., Devon Energy Production, COG Operating LLC

All offset operators and unleased mineral interest owners have been notified by Certified Mail of the proposed non-standard wellbore. The notice letter advises said operators and owners that in the event they have an objection to COG's application, they must file a written letter with the Division within twenty (20) days from the date the Division receives this application.

Enclosed for your consideration are the Administrative Application Checklist, White Falcon 16 State Com #12H C-102 showing the proposed producing area with first and last perforations, map outlining the

Good afternoon Mike,

Per your requests below, I have attached the following:

1. Proof of delivery of NSL notification to offset operators/owners (return receipt information)
2. Reservoir engineering justification for the requested spacing and development
3. Map showing producing and planned Bone Spring wells in the affected acreage
4. Leasehold/Operating Rights information for offsetting acreage

Please let me know if you have questions about any of the information provided here.

Thank you,

**Subject:** [External] White falcon 16 State Com Well No. 12H

\*\*\*\* External email. Use caution. \*\*\*\*

Debora:

I need return receipts for the affected parties for the White falcon 16 State Com Well No. 12H, API 30-025-43697.

I need a more substantial reason for NSL application-to maximize reserves is no longer acceptable. Is there engineering reasons-if so get an engineer to state why. If geological get a geologist to sign the statement  
OCD is also requiring the working interest percentages in the project area, and affected offsets.

Thank You

Mike

## **Memorandum**

**To:** Michael McMillan  
Engineering Bureau  
New Mexico Oil Conservation Division

**From:** T. J. Midkiff  
Reservoir Engineering Lead  
COG Operating LLC

**Date:** May 4, 2017

**Subject:** Overlapping stimulation of 3<sup>rd</sup> Bone Spring Reservoir

In order to effectively develop the reserves from the 3<sup>rd</sup> Bone Spring Sand of the Bone Spring pool, COG Operating LLC believes the wells (White Falcon 16 State Com 12H, White Falcon 16 State 13H, and White Falcon 16 Federal Com 11H) need to be spaced according to the configuration proposed. Spacing greater than what has been proposed will result in stimulated reservoir volumes that do not overlap and cause waste of an economic resource. It is important to understand that future development of these reserves will be compromised due to the presence of the previously stimulated and produced offset reservoir. COG's plan for simultaneous development of said reserves has been proven by industry to be most the prudent and economic means for recovery.
