<b>Was a Watercourse Reached?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>If YES, Volume Impacting the Watercourse</b> N/A	

**If a Watercourse was Impacted, Describe Fully.** N/A

**Describe Cause of Problem and Remedial Action Taken.**  
Oil storage tank had a hole on the bottom of the tank resulting in the release. Upon discovery the production was switched into a different tank. The tank was then emptied.

**Describe Area Affected and Cleanup Action Taken.**  
10 BBLS of Oil was released from the storage tank. The release originated at the bottom of the storage tank where a hole developed. All released fluids remained inside the lined SPCC containment. A vacuum truck was dispatched and 10 BBLS of Oil were recovered. Once fluids were removed the liner was visually inspected by Devon field staff for any pinholes or punctures and none were found. Based on this inspection there is no evidence that the spill fluids left the lined containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
