RE: ADMINISTRATIVE APPROVAL OF UNORTHODOX LOCATION

JICARILLA 102 #7 1,850' FNL & 2,390' FEL SECTION 3-T26N-R4W

RIO ARRIBA COUNTY, NEW MEXICO

Dear Mr. Stogner:

Reference is made to your E-mail concerning the fact that the subject well is located at an unorthodox spot for an E/2 Blanco Mesaverde spacing unit and there is no record of authorization by the New Mexico Oil Conservation Division.

The Jicarilla Apache 102 # 7 well (API 30 039 06709) was originally drilled to a total depth of 8,192' and completed as a Basin Dakota gas well on June 12, 1963. It was dedicated to a N/2 spacing unit and was at an orthodox location.

On January 28, 1970, Pan American Petroleum Corp. (CDX Rio, LLC's predecessor) requested Administrative approval to re-complete the well in the Gallup formation and dual it with the Dakota formation. At the time it was an undesignated Gallup pool, and was closer than 790' to the outer boundary of the 161.14 acre NE/4 of Section 3 spacing unit. The request for a non-standard location was approved be Administrative Order NSL - 457, dated February 19, 1970. On October 28, 1970, Case No 4443 was called to review a down-hole commingling application for the subject well as to the BS Mesa Gallup and Basin Dakota gas pools, which was approved by Order # R-4059.

On July 24, 2001, Amoco Production Company (CDX Rio, LLC's predecessor) submitted a sundry to the Bureau of Land Management requesting permission to recomplete the subject well in the Blanco Mesaverde formation and down-hole tri-mingle it with the existing Basin Dakota and BS Mesa Gallup pools. In the request Amoco stated that the working, royalty, and overriding royalty interests were identical and production would be allocated on a subtraction method (copy attached). The Bureau of Land

definition and the figure 29th

Management approved Amoco's request August 8, 2001, and the work was completed on December 16, 2002.

Evidently Amoco failed to request permission from the New Mexico Oil Conservation Division to tri-mingle or request administrative approval for a non-standard location.

The re-completion was to an existing Dakota well that was at an orthodox location with a N/2 spacing unit and the zone to be added being dedicated to an E/2 stand-up spacing unit. Since the existing bore-hole is located 1,850' FNL & 2,390' FEL of Section 3 it results in the re-completed Blanco Mesaverde being closer than 660' to the west line of the spacing unit. The stand-up spacing unit for the Mesaverde had been originally established when the Jicarilla Apache 102 #6 well (API 30 039 06666) was drilled and completed on September 25, 1958 as a Pictured Cliff/Mesaverde completion. The N/2 lay-down spacing unit for the Dakota formation was established with the completion of the Jicarilla Apache 102 #7 well on April 27, 1963.

CDX Rio, LLC purchased the subject well from BP America effective December 1, 2002 but did not assume operations until March 1, 2004. The completion of the Mesaverde was performed by BP America during the transition period and CDX was unaware that administrative approval for a non-standard location had not been obtained until receipt of your E-mail referred to above.

CDX Rio, LLC hereby requests Administrative Approval for an Unorthodox Location of its Jicarilla 120 #7, Mesaverde well under the provisions of New Mexico Oil Conservation Division Order R- 10987-B (Blanco Mesaverde).

CDX Rio, LLC is the operator of the W/2 of Section 3-T26N-R5W, being the direction of encroachment; consequently no other offsetting operators are affected.

Attached is a well location plat showing dedicated acreage (C-102), and a map showing all offsetting owners.

Your favorable consideration of this request would be appreciated.

Sincerely,

Richard Corcoran Land Manager

JICARILLA 102 #7 1,850' FNL & 2,390' FEL SECTION 3-T26N-R4W

RIO ARRIBA COUNTY, NEW MEXICO

Dear Mr. Siple,

CDX Rio, LLC has filed with the New Mexico Oil Conservation Division (NMOCD), an application for the Administrative Approval of an Unorthodox location of the Jicarilla Apache 102 #7 well (API 30 039 06709), CDX Rio, LLC purchased the subject well from BP America effective December 1, 2002 but did not assume operations until March 1,2004. CDX Rio, LLC was unaware that administrative approval for a non-standard location had not been obtained prior to the purchase of the subject well.

Objections to this application must be sent to the NMOCD at 1220 South St. Frances Dr. in Santa Fe, New Mexico 87505, within 20 days of receipt of this application. Your cooperation in this matter is appreciated.

Sincerely,
