Dear Nancy, Raye, Martin & Brent

I'm looking at the directional survey plans for the Snakebite Fee # 1 well that has been submitted. I see that the 'start drop' (where the well bore is to drop vertically down to TD) is projected to be at a depth of @ 1900'. At this depth the well is projected to be orthodox as regards to being 330' from the lease lines.

However, please refer to the e-mail below as I picked the top of the DMG ( tagging the Lamar Limestone) at 1803' for an offset well. Not to quibble over +/- 100' as to where your well will top the DMG, I need to let you know that this well will still be considered non-standard if my projections are correct and everyone agrees that the Lamar (in

OCD) is 1st cousin of the DMG. Again, please refer to MNOCD Rule 111.C. (1) & (2). I know of no oil or gas production in the Lamar Limestone down to the top of the Bell Canyon formation anywhere in the DMG in New Mexico or Texas, do any of you? The top of the Bell Canyon of the DMG of the same offset well is @ 1995'. If Mr.. Stogner or someone that holds a 'wand' with the OCD that can give me a thumbs-up, and make conditions of approval for this well and others as for example: "Well may produce only from the sands of the DMG. I'll gladly start pressing that button in OCD On-Line as final approval when I get the other needs for this well & others as described below. Otherwise, this well and others similar to this situation will require a NSL.

Visit w/you later,  
 Bryan

---

**From:** Arrant, Bryan, EMNRD  
**Sent:** Thursday, December 29, 2005 9:45 AM  
**To:** land2@marbob.com  
**Subject:** needs

Good Morning Nancy, Brent and Martin:

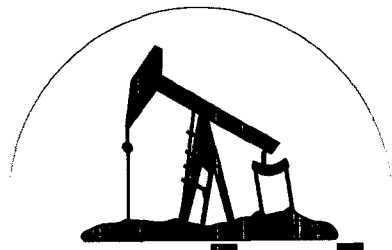

I am just starting to dive into the APDs that you have submitted on OCD On-Line & I need for you or someone to draft me up C-102s similar to the ones that I gave to Martin yesterday. I need on the C-102s to show the project area, producing area, penetration point and terminus point.

More importantly, am reviewing the S.S. Snakebite Fee # 1 and I need to be assured that the penetration point of the Delaware will be orthodox according to our rules. In the offset well, the Top of the Delaware Mountain Group (DMG) is the Lamar Limestone which is @ 1803'. The C-105 (completion report) verified this as the Bell Canyon of the DMG as the same (depth) that your company submitted.

In reviewing the directional drill plan for this well, from my calculations this well bore will be non-standard as it enters the DMG and will need a NSL in order to produce. At @ 1806' the well deviates @ 63' from vertical, which will be @ 265' from the lease line.

After you look at this and the other wells, please give me a shout.

Thanks, Bryan

Administrative Approval Request  
SS Snakebite #2  
330' FNL & 1550' FEL  
Section 9 T-22S R-27E  
Eddy County, New Mexico

2006 APR 3 PM 1 11

Dear Mike:

Marbob Energy Corporation respectfully requests administrative approval for an unorthodox location of the SS Snakebite #2 well as referenced above. Attached is an OCD Form C-102 showing the proposed oil well spacing unit along with a map showing the adjoining spacing units. The well is unorthodox to the east boundary of the NW/4NE/4. Notice has been provided to the operator and working interest owners of that unit.

The proposed location was originally staked at the orthodox location of 330' FNL and 1650' FEL. That location has severe slope and the nearest flat spot was if we moved 100 feet to the east. We initially filed this location as deviated bottom hole location which would have made it orthodox. With the significant cost increases in drilling we have delayed the drilling of this location to see if the unorthodox approval can be obtained. This Delaware location is a west offset to the Snakebite #1 located 342' FNL and 385' FEL in the same section. We recognize that there are additional orthodox locations but we are trying to hold the 990' – 990' location and 2310' – 990' location as possible 20 acre infill locations if the reserves can not be captured by the original 40 acre wells. The well is crowding the NE/4NE/4 which is owned by the identical working interest owners, overriding royalty owners, and royalty owners. We have also sent notice to the offset operator to the north and the royalty owners in the affected proration unit. We are the operator of all of the other proration units. A copy of the notice letters are enclosed with the application. When we receive the green cards back we will fax you a copy of those to show notice.

Thank you for your consideration of this. If you need to talk with me further please call me at 800-748-1550.

Sincerely,

A handwritten signature in cursive script that reads "Raye Miller".
