Describe Cause of Problem and Remedial Action Taken.* Failure of packing on pump caused release of sour crude oil. Pump was repaired. The line has approximately 70 psi and produces approximately 780 of crude oil per day. The gravity of the crude is 35.7 and H2S content is less than 10 ppm.

Describe Area Affected and Cleanup Action Taken.* Per the approved NMOCD Plains Marketing, L. P., Remediation/Closure Plan, dated 31 October 2005, the crude oil release site was excavated; the impacted soil placed on a poly-liner adjacent to the excavation, confirmation soil samples were collected from the floor & walls of the excavation. The stockpiled soils were transported to Lea Station Land Farm; with treated soil approved for reuse transported to the site and utilized as backfill. Installation of the 40-ml poly was completed and backfilling was conducted

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
