Dear Mr. Tomberlin:

Reference is made to your application for down hole commingling of gas from the Mesaverde and Pictured Cliffs formations. We have received your final (Ration Method) allocation factors for this well. After reviewing the production histories for this well and wells in the vicinity, we agree with your allocation factors established for this well.

<u>FORMATION</u>	<u>GAS</u>
PICTURED CLIFFS	48%
MESAVERDE	52%

Commingled production from each zone must be reported in accordance with the allocation factors identified above. The effective date will be the date downhole commingling actually occurs.

If you have any questions regarding the above, contact Matt Halbert at (505) 599-6350.

Sincerely

Jim Lovato
