Re: Amend existing DHC order # 2717  
Jicarilla Apache # 11  
API # 30-039-08149  
Unit "M" Sec. 28, T-26-N, R-5-W NMPM,  
Rio Arriba County, New Mexico  
South Blanco Pictured Cliffs (Prorated Gas- 72439)  
Basin Dakota (Prorated Gas- 71599)  
Blanco Mesaverde (Prorated Gas-72319)  
Otero Chacra ( Gas- 82329) Pools

Dear Mr. Catanach,

Marathon Oil Company would like to amend Downhole Commingling Order # 2717.  
The Pictured Cliffs has been isolated between 4-1/2" & 7-5/8" casing. We ran 4-1/2" casing w/ packer and set just above liner top.  
The Dakota has been isolated below a RBP which we were unsuccessful at milling out and retrieving old packer.  
The Blanco Mesaverde and Otero Chacra have been perforated and stimulated.  
Please use the allocation percentages that were filed for on DHC # 2717 for the Chacra and Blanco Mesaverde and adjust accordingly.

If additional data is needed please contact me at (915) 687-8357
