The Ohio Oil Company respectfully requests that you grant this application for authority to dually complete its Mr. H. Turner Well No. 3, 19304 FSL and 9301 FEL, Section 29, T-21-S, R-37-E. The Mr. H. Turner Well No. 3 was originally completed on October 1, 1949, as an oil well producing from the Hare Oil Pool. In June, 1956, the well was plugged and recompleted as a single completion gas well producing from the Tubbs Gas Pool. The Ohio Oil Company now desires to dually complete the well in such a manner as to produce gas from the Tubbs Gas Pool through the tubing and gas from the Elisebry Gas Pool through the production casing-tubing annulus. Ohio intends to install an efficient packer between the two completions and to perform the completion so as to prevent waste in each reservoir. A schematic diagram showing the proposed method for dually completing the well is attached. Subsequent to the completion, Ohio will submit to the Commission data showing the detail completion program as well as plans for future testing which will be made regularly to determine if waste is not occurring in either reservoir.

The Ohio Oil Company further respectfully requests that you grant this application for the approval of the unorthodox location of the well, and for the designation and formation of an 80-acre non-storage gas proration unit consisting of the N/2 of SE/4, Section 29, T-21-S, R-37-E, Tubbs Gas Pool, Lea County, New Mexico. The Ohio owns the gas leasehold estate on the acreage included in proposed gas proration unit, and the well to be dually completed in the Elisebry and Tubbs Pools.
