Gentlemen:

Adobe Oil Company filed the above well as a completion in the Wolfcamp formation. This should have been filed in the upper Penn, but we made a mistake since these two formations are hard to distinguish. Since completion we have checked our logs against the logs in the Circa upper Penn pool and we are perforated in the same zone as the offset wells. It would be appreciated if you would place our well in the same pool.

The Circa pool calls for the well to be drilled within 160 feet of the center of the quarter of the quarter. We have drilled our well 200' from the center of the quarter of the quarter. The reason for this is shown on the attached plats. The farmer had an irrigation ditch and our location that was staked 1980' FN&EL fell within 20 feet of the irrigation ditch and we moved the stake 200 feet east which made our location fall 1780' FEL. As shown on the attached plat you can see we own all offsetting our northeast 160 acres.

If you have any questions concerning our request please do not hesitate to call collect.

Yours very truly,

M. D. Rogers
Vice President
