Mr. Joe D. Ramey
New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Joe:

Please refer to our letter of August 25, 1975 wherein we requested the administrative approval for the unorthodox drilling location of my Cossatot M #2 well. Enclosed you will find a copy of the Commission's hand scrolled response to this request. I do not understand what this unsigned, handwritten message means, however, let me elaborate on the topographical conditions that necessitate this location.

1. The Railroad runs in a Northwesterly, Southeasterly direction across the center of this 40 acre tract. As you are aware, the Railroads require a rather broad right-of-way with wells not to be drilled on their right-of-way. This is a requirement due to conditions of safety.
2. There are three wells located on this 40 acre tract to the West of the Railroad. This being John H. Hendrix Thomas Long #2 located Unit Letter M, Section 11, T-22-S, R-37-E, Shell Oil Company's Thomas Long #1, and R. L. Parker's #2, a plug and abandon well. You can see it is getting rather crowded on the West side of the Railroad track.
3. Further, there are two oil pipelines running East-West across this 40 acre tract.
4. There are numerous other flow lines belonging to Shell Oil Company, Parker Drilling Company, and Exxon's Paddock Water Flood.
5. It is my understanding that a representative of the Commission's Hobbs Office has made a visual inspection of the 40 acre tract and concurs that this is just about the only drilling site available.

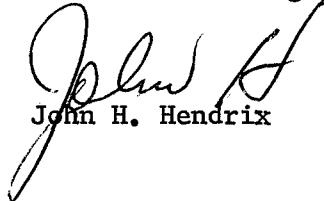

In addition to the returned application, your office furnished us a copy of Commission regulations explaining the procedure for obtaining administrative approval for an unorthodox location.

September 4, 1975
Page 2

Would you believe that we also had a copy of this in our office? However, it did not include the word "legible" nor did we have the different sentences underlined in red. We have fully complied with that procedure and again do not understand what the hold up is.

Your early consideration of this approval will be appreciated.

Best Personal Regards,

John H. Hendrix

RE: Application for Administrative
Approval of Unorthodox Location
John H. Hendrix - Cossatot M No. 2
located in Unit M of Section 11,
T-22-S, R-37-E

Gentlemen:

This is to request administrative approval of the above described unorthodox location for my Cossatot M No. 2. Due to topographical condition existing on this 40-acre tract, your approval will permit us to drill this well in a timely manner. The location was moved 100 feet East due to railroad right-away, also five oil and gas pipelines are located in this area.

Your early consideration of this application will be appreciated.

Yours very truly,

JOHN H. HENDRIX

Please be specific about
well locations. (Old & new)
What pool is the well to be
producing from.

) allotted to the well and no Form C-101 will be approved by the Commission or any of its agents without such proper designation of acreage.

F. The Secretary-Director of the Commission shall have authority to grant an exception to the well location requirements of Sections B and C above without notice and hearing when the necessity for such unorthodox location is based upon topographical conditions or the recompletion of a well previously drilled to another horizon, provided said well was drilled at an orthodox location for such original horizon.

Applications for administrative approval of unorthodox locations shall be filed in triplicate and shall be accompanied by plats showing the ownership of all leases offsetting the proration or spacing unit for which the unorthodox location is sought, and also all wells completed thereon. If the proposed unorthodox location is based upon topography, the plat shall also show and describe the existent topographical conditions.

All operators of proration or spacing units offsetting the unit for which the unorthodox location is sought shall be notified of the application by certified or registered mail, and the application shall state that such notification has been given. The Secretary-Director may approve the unorthodox location upon receipt of waivers from all offset operators or if no offset operator has entered an objection to the unorthodox location within 20 days after the Secretary-Director has received the application.

G. Whenever an exception is granted, the Commission may take such action as will offset any advantage which the person securing the exception may obtain over other producers by reason of the unorthodox location.

H. If the drilling tract is within an allocated oil pool or is placed within such allocated pool at any time after completion of the well and the drilling tract consists of less than 39 1/2 acres or more than 40 1/2 acres, the top unit allowable for such well shall be increased or decreased in the proportion that the number of acres in the drilling tract bears to 40.

I. If the drilling tract is within an allocated gas pool or is subsequently placed within an allocated gas pool, and the drilling tract consists of less than 158 acres or more than 162 acres in 160-acre pools, or less than 316 acres or more than 324 acres in 320-acre pools, the top allowable for such well shall be
