January 23, 1976

New Mexico Oil Conservation Commission(3) P. O. Box 2088 Santa Fe, New Mexico 87501

Attention Mr. J. D. Ramey Secretary-Director

Gentlemen:

Continental Oil Company, as operator of the MCA Unit, hereby respectfully requests permission to re-enter and complete as a Maljamar Grayburg San-Andres producer its Pearl B No. 27 Well, located 1295' FSL and 1245' FEL of Section 25, T-17S, R-32E, Lea County, New Mexico. This well was originally drilled by Kewanee Oil Company in 1949, in conjunction with the gas repressuring program which was in effect at that time. The well was found to be water-productive in the zones of interest and the well was plugged and abandoned with all pipe left in place.

It is proposed to re-enter this well, to be redesignated MCA Unit No. 356, stimulate the well in the open-hole interval 4220 to 4330, test and place on production.

The attached plat shows that this well is located 75' from the nearest boundary of the MCA participating area. The offset operator is Continental Oil Company, the lands of which are a part of the same basic lease on which the well was originally drilled and is within the MCA Unit area.

It is respectfully requested that immediate approval be given this application for non-standard location under the authority of Order No. R-2403, as amended, and the original authorization for the drilling of this well.

Yours very truly,

mpRon
