AMINOIL FILE SERIES 2841
MALAGA AREA

Gentlemen:

Aminoil is preparing to start its Kirkes No. 1 Well, which Aminoil expected to stake in a standard location in the S/2 of Section 10, T-24-S, R-28-E, NMPM, Eddy County, New Mexico. Aminoil's surveyor found that the standard location which Aminoil had expected to utilize fell on a railroad track within a railroad right-of-way crossing the S/2 of Section 10. In investigating alternate locations in the immediate area we find various other topographical problems including county roadway and irrigation ditches as well as the railroad track.

Taking the foregoing into consideration Aminoil has now concluded the only feasible location for this well will be 2080' FSL and 1773' FEL of said Section 10. This alternate location is 207' east of the standard location of which Aminoil previously had expected to utilize. Said location is unorthodox pursuant to the Rules and Regulations of the New Mexico Conservation Division.

We are seeking administrative approval of the foregoing unorthodox location from the New Mexico Oil Conservation Division and will therefore respectfully request that you provide us with evidence that you have no objection to the foregoing unorthodox location. If you have no such objection please execute one copy of this letter in the space below and return the same to us for our files and for further submittal to the appropriate offices of the New Mexico Oil Conservation Division. Inasmuch as several leases covering interests in the S/2 of Section 10 have primary terms which will be expiring in the near future it is important that we commence a well on this tract as soon as possible and we therefore request your early consideration.
