Re: #6 Harris Federal
1650' FSL & 660' FEL
Sec. 23-15S-27E
Chaves Co., NM

Buffalo Valley Pennsylvanian Gas

Dear Dan,

We are requesting administrative approval for an unorthodox location, to Buffalo Valley Field Rules, because of topographical reasons. The location originally was staked 1650' FSL & 990' FEL of Section 23. This location was on the edge of the caprock and therefore it is impossible to build a location for the drilling of the well. We re-staked the well 1650' FSL & 660' FEL to make a drillable location.

As per our telephone conversation 7-9-81, I have enclosed an ownership map, topo maps showing the original and proposed location, and letters of authorization from offset operators. Read & Stevens controls all the leases except the S $\frac{1}{2}$ Section 24. J.P. Toles, Depco, Husky and Jack McClellan have approved this location.

I need your help in getting this location approved as soon as possible because one lease expires 8-1-81 and we need time to build locations and roads. If you need any more information in regards to this matter please call.

Thank You

Bruce Stubbs

TO OFFSET OWNERS:

Re: # 6 Harris
1650' FSL & 660' FEL
Sec. 23-15S-27E
Chaves County, New Mexico

Gentlemen:

Read & Stevens, Inc. proposed the drilling of the captioned well at a location of 1650' FSL and 990' FEL, section 23. This location is on the edge of the caprock and therefore it is impossible to build a location for the drilling of the well.

Due to the fact that you are an offset owner, Read & Stevens hereby requests permission to drill the well at an unorthodox location being 1650' FSL and 660' FEL, section 23.

As evidence of your permission, please execute and return one copy of the letter to our office at your earliest convenience.

Yours very truly,

READ & STEVENS, INC.
