Re: Non-Standard Location approval based

on Topography:

McClellan "MB" Federal #3 1100' FNL & 1980' FWL

Section 31-T5s-R25e

Dear Sir:

The proposed drillsite for the above captioned well reflects the move out of a deep draw 660 feet from the north line. The Federal agencies would not have approved the orthodox location in the draw, which goes west to east.

Pursuant to the provision of Rule 104F, we request administrative approval for this unorthodox location based on topography.

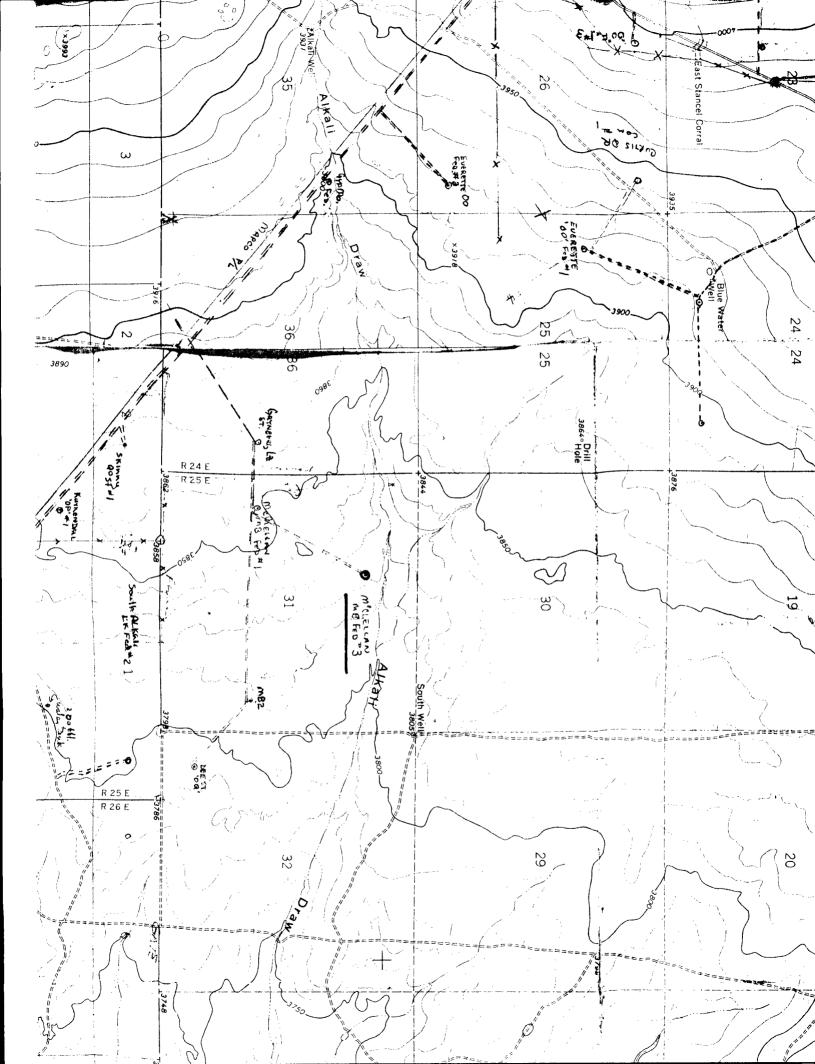

Sincerely,

Yates Petroleum Corporation
