Dear Sir:

Fee Lease

*660 FNL AND 990 FWL,
SEC. 26, T22S, R27E*

Santa Fe Energy Company is requesting administrative approval for an unorthodox location due to geologic reasons.

Please find the enclosed seven (7) copies of the following:

1. Letter requesting administrative approval of unorthodox location
2. Platt showing acreage dedicated
3. Geologic exhibits
4. Form C-101
5. Form C-102

Six (6) copies of all of this has been send to the District Office in Artesia.

Sincerely,

Billie Hood

Re: Henry No. 1
Sec. 26, T-22S, R-27E
Eddy County, New Mexico

Gentlemen:

Santa Fe Energy Company requests administrative approval of an unorthodox location for a 12,200'± Morrow test to be drilled 990' FWL, 660' FNL, Section 26, T-22S, R-27E, Eddy County, New Mexico.

The reasons for this request are geologic. The relevant geologic exhibits are enclosed.

All offset operators have been notified by certified or registered mail of this request for administrative approval of an unorthodox location.

Sincerely,

Billie Hood
Senior Production Clerk

RE: Geological Exhibits
SFEC #1 Henry
Eddy County, NM

Dear Mr. Stamets:

Santa Fe Energy Company, Exploration Department, is proposing an unorthodox location (660' FNL, 990' FWL) in Section 26-22S-27E, Eddy County, NM. Reasons for this location are as follows:

1. The Apexco Henri Grandi No. 1 (1880' FSL, 1980' FWL, Section 26-22S-27E) tested a considerable amount of formation water from the Morrow formation during drilling and completion. This well is down-dip to the proposed Henry location and was found to be non-commercial and wet from the Morrow (See Map 1). Santa Fe Energy Company's proposed location is structurally approximately 100 feet updip to the Apexco well in the Morrow formation. It is Santa Fe Energy Company's interpretation that the requested unorthodox location will be far enough up structure at the Morrow level to be above any gas/water contacts.
2. The "Nichols Sand" is one of Santa Fe Energy Co's major objectives in the Morrow formation. From the interpretation, (see Map 2) the "Nichols Sand" is probably best developed in the northwest corner than any other place in Section 26. This interpretation further supports the unorthodox location.

The location Santa Fe Energy Company has proposed is the most logical one based upon knowledge of the Morrow formation in the South Carlsbad Field.

Yours truly,

Steve Johnston
Geologist

Gentlemen:

Pursuant to conversation with Mr. Quintana, enclosed please find copies of the executed Waiver Letters from the offset operators to the above referenced well. As you will note, Exxon has not signed the Waiver Letter as of yet, however, their Land Department has advised Santa Fe Energy Company that they did not plan to object to our proposed location.

Hopefully this information will assist you in your determination on granting administrative approval to the above well location.

Sincerely yours,

Gentlemen:

In response to your letter of September 12, 1984, please be advised that Santa Fe Energy Company is not agreeable to providing your company with the drilling reports, logs, or any other pertinent well information on the referenced well. Inasmuch as Santa Fe's unorthodox location moves away from your acreage, we feel that it is unlikely that Santa Fe's Henry No. 1 will drain your acreage. Since Santa Fe will not agree to your request, it is your company's prerogative whether to agree to Santa Fe's location or not. In this regard, please find enclosed two additional waiver letters for your execution and return to the Commission and to this office.

Should you have any questions, please advise.

Sincerely yours,

Patrick J. Tower
