Mark E. Fesmire Oil Conservation Division 1220 South St. Francis Drive Santa Fe, New Mexico 87505

Dear Mr. Fesmire:

Pursuant to Division Rule 104.F(2), Cimarex Energy Co. of Colorado applies for approval of an unorthodox gas well location for the following well:

<u>Well</u> :	Laguna Deed Unit Well No. 11
Location:	660 feet FNL & 410 feet FWL
Well Unit:	W ¹ / ₂ §25-19S-33E, Lea County, New Mexico

The well will be drilled to a depth sufficient to test the Morrow formation (East Gem-Morrow Gas Pool). The pool is spaced on 320 acres, with wells to be located no closer than 660 feet to a quarter section line nor closer than 10 feet to a quarter-quarter section line. A Form C-102 for the well is attached as Exhibit A.

The location is based primarily on topographic reasons. A well at a standard location is in a sand dunes lizard study area, severely restricting locations. See Exhibit A. Moving the well to the west places the location outside the lizard study area. The lizard study area is located east of an existing lease road. See Exhibit B. Thus, the proposed location is the least unorthodox location in the non-study area.

Applicant has already drilled a Morrow well in the SW¹/₄ of Section 25 (the Laguna Deep Unit Well No. 8), so the well cannot be moved to that quarter section.

The E¹/₂ of Section 26 and the W¹/₂ of Section 25 comprise the Morrow P.A. for the Laguna Deep Unit, under which ownership is common. Therefore, no one in the E¹/₂ of Section 26 was notified. The well does encroach slightly on Section 23, operated by Penroc Oil Corporation. See Exhibit C. It was notified of the application by the letter marked Exhibit D.

Please call me if you need further information on this application.

Very truly yours,

•
