NATURE OF RELEASE

Type of Release	Crude Oil	Volume of Release	17 bbls.	Volume Recovered	15 bbls.
Source of Release	Pipeline	Date and Hour of Occurrence	05/17/2007	Date and Hour of Discovery	5/18/07 at 11:18 AM
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Larry Johnson (OCD - Hobbs Office) Left Message at 4:44 pm on 5/18/07.		
By Whom?	Darrel Lester	Date and Hour	05/18/07 at 4:44 pm		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

Cause of the leak was due to a strainer valve failure which caused the sump to overflow. A high level alarm is being installed in an effort to prevent re-occurring failures. The leak was contained within the station property. Impacted soil will be delineated, excavated and/or blended on-site within regulatory guidance limits as outlined in the NMOCD Rule 116.

Describe Area Affected and Cleanup Action Taken.*

The leak area affected is apx. 800' x 1' West and 150' x 30' E. Average depth of the leak is 12 inches. The clean up action included immediate response to stop the leak and containment of impacted soils. A third party environmental remediation company is in the process of delineating and excavating the contaminated soil. The clean up crews worked through the weekend and will continue working until the site is clean and work is completed. Additional Information Requested:

The size of the line = 2 inch ball valve line

The average throughput of the line = 42 gallons per month

H2S is not present at this "sweet" crude oil pipeline station site.

Est. Age of pipeline = 22 years.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: C-141 Revised Initial Submittal
Centurion LMEP # 308-07-025

Re: Centurion Pipeline, LP
Gladiola Station
Sec 5, T-12-S, R-38-E
Lea County, New Mexico

Dear Mr. Johnson:

Centurion Pipeline, L.P. (Centurion) previously submitted this attached initial C-141 for the above referenced leak site located on land owned by Mr. Burris.

We inadvertently put the wrong date of the leak on the initial report. Please accept this revised submittal showing the correct date of the leak as 5/18/07.

If you have any questions or need additional information, please call me at (432) 978-8067.

Sincerely,
Centurion Pipeline, LP

Becky Moore
HES/Regulatory Compliance Coordinator
