Re: Unorthodox Gas Well Location
Northeast Blanco Unit No. 468
415'FNL - 1215'FEL, Sec.35, T31N, R7W
San Juan Co., New Mexico

Dear Mr. LeMay;

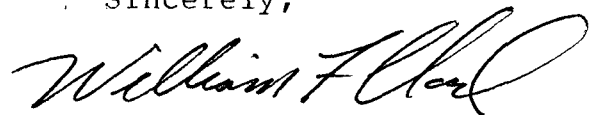

Blackwood & Nichols Co., Ltd. requests administrative approval of an exception to the footage requirements of Rule 7, R-8768 for the subject well, located in the Basin Fruitland Coal Pool.

This request is for exception due to topography. A Vicinity Map and C-102 are attached for your reference. Blackwood & Nichols investigated the possibility of a location at a standard footage location south of the existing NEBU # 68 but could not fit it in between the steep bluffs above Navajo Reservoir and the ROW for the two Northwest Pipeline Corp. mainlines that run adjacent to the location. This location is 3500' from the nearest Fruitland Coal well proposed by Blackwood & Nichols Co., Ltd. and 4200' from the nearest property line of an offset operator.

The east half of Section 35, T31N, R7W, will be dedicated to this well. Blackwood & Nichols Co., Ltd. has notified all operators of offset proration units of this request by certified mail.

Your prompt consideration of this request is appreciated.

Sincerely,

William F. Clark
Operations Manager
Blackwood & Nichols
Co., Ltd.

Juan County, New Mexico.*

Dear Mr. Clark:

The copy of the topo map attached to the subject filing was of poor quality and showed very little detail. Please supplement your filing with a better, more readable copy. Also I was somewhat unclear why the location could not be moved to the east of the No. 68 well, please address this issue in detail, include a schematic of the well pads if needed.

Further, please indicate on the supplemental plat all offsetting operators and include a copy of the return receipt of all offset operators contacted.

Thank you for your cooperation in this matter.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael E. Stogner".

San Juan Co., New Mexico

Gentlemen:

Blackwood & Nichols Co., Ltd. requests that you waive objection to the subject unorthodox location. This well offsets your properties to the east and south. The location is non standard due to existing topography and does maintain the minimum footage seperation prescribed by the NMOCD to any existing or proposed Fruitland coal wells operated by your company.

Your prompt consideration of this request is appreciated.

Sincerely,

William F. Clark
Operations Manager
Blackwood & Nichols
Co., Ltd.

Waiver of Objection

Section 35 - T31N- R7W. Basin Fruitland Coal Gas Pool. San
Juan County, New Mexico. Unorthodox Coal Gas Well Location
Application.

Dear Mr. Stogner:

Please accept our apologies for sending you a very poor quality topographical map with our unorthodox request. The enclosed supplemental map and project area description from the NEBU #468 Archeological Report, has the proposed location spotted and the well pad and construction zone outline to the correct scale. I have also located the Northwest Pipeline's 30" main gas line and the NEBU #68 Mesa Verde well. The supplemental map more clearly supports the original proposed location after taking into account all topographical and manmade features the original map failed to explain.

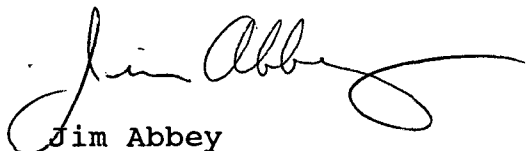

Based on the topographical map and our field surveys, the area south and east of the #68 is too small to allow for an open hole, completion type, coalbed methane well to be drilled in a safe manner.

The NEBU #468 proration unit is bordered on all four sides by Blackwood & Nichols. The only offset proration unit is located adjacent to the southeast corner. Meridian has operated the west half of section 1, T30N, R7W, under a designation of agent with Northwest Pipeline and was mistakenly sent a Waiver of Objection Request. Northwest Pipeline is currently in the process of transferring operatorship to Phillips Petroleum Company. Both Northwest Pipeline and Phillips have been sent a Waiver Proposal. As per your request, a Northeast Blanco Unit map with offsetting operators is also enclosed.

Oil Conservation - Page 2
March 28, 1990

Blackwood & Nichols believes the NEBU #468 is prudently located and will economically develop the natural resources. Please advise if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jim Abbey". The signature is fluid and extends to the right with a long, sweeping tail.

PROJECT AREA

Northeast Blanco Unit 468

Legal Description: T.31 N, R. 7 W, Section 35. W 1/2 NE 1/4 NE 1/4
E 1/2 NW 1/4 NE 1/4
Section 35 , 415' F/NL, 1215' F/EL

New Mexico Prime Meridian, San Juan County, New Mexico, 6323' Elevation

Map Source: U.S.G.S. 7.5' Pine River, New Mexico 1954 (Photorevised 1971)

Land Jurisdiction: Bureau of Land Management, Farmington Resource Area

Project Area: 350' x 250' (well pad)
450' x 350' (well pad & construction zone)
Surveyed Area: 650' x 550' (well pad, construction and buffer zones)
Acres: 8.20

Environment: The project area is on a finger of Burnt Mesa on the east side of Negro Andy Canyon overlooking Navajo Reservoir to the south. The area to the east is an east-facing slope which is steep and heavily cobbled the entire way down to the reservoir. The area immediately north of the existing pad (NEBU 68) and south of the center stake, is a pinyon and juniper woodland with sandy soil. The 10 to 15% cover consists of pinyon and juniper, sagebrush, grasses, forbs, snakeweed, prickly pear cactus and narrow leaf yucca. There are also sandstone outcrops ranging in size from pebbles to boulders. Two whole, but cracked petrified logs are present, as are numerous "chunks" of petrified wood on the west side of the location. North of the center stake is a chained area with a 35% cover of sagebrush, grasses, forbs and prickly pear cactus.

Project Description: The project consists of a gas well near existing well pad NEBU 68. An existing pipeline parallels the west side of the proposed well.

Cultural Resources: No sites or isolated locus were found during the survey.

Recommendations: Archaeological clearance is recommended.
