RE: Loco Hills Prospect
W/2 of Section 2
T18S, R30E
Eddy County, New Mexico

Dear Mr. Stogner:

Mewbourne Oil Company feels it is necessary to apply for and receive an unorthodox location drilling permit to drill a well on its Loco Hills Prospect located in Section 2, T18S, R30E, Eddy County, New Mexico. A location 660'FWL(nearest side boundry) and 990' FSL(nearest end boundry) in the W/2 of Section 2 would give Mewbourne Oil Company a greater likelihood of encountering a thickness of Lower Morrow Sand sufficient to make a commercial well.

Lower Morrow sands colored orange and brown are the dominant Morrow Producers in the area (See Cross Section C-C'). The State CE #1(unit F, Section 2), drilled at a legal location, produces from a Middle Morrow sand while the Lower Morrow sands are poorly developed. The Enron (Belnorth) Nelson "3" Federal #9 (unit J, Section 3) had poor and unproductive Lower Morrow sands. Therefore, our primary reason for this unorthodox location request is to place our well as far away from these wells as possible, while attempting to encounter thick Lower Morrow channel sands.

The enclosed sand isopachs and structure map show the northwest-southeast trend of the Lower Morrow. The Anadarko Arnold Federal #1 (unit G, Section 34) had 44' of productive Lower Morrow sand. Based on the apparent narrowing of the Lower Morrow channel system, the prospect is predicted to have greater sand thickness at the proposed location rather than at a standard location (marked "X"). In redrilling the W/2 of Section 2, the Middle Morrow sand also has backup potential. The proposed location also distances Mewbourne Oil from the drainage radius affected by the State "CE" #1. The Strawn Formation also had a show of oil while drilling the State "CE" #1. The proposed location may also be moving in a direction of better Strawn porosity development.

The unorthodox location, which Mewbourne seeks, is clearly moving away from the nearest well (the Arnold Federal #1, Section 34) producing from the Lower Morrow formation. In fact, the east half of T18S-R30E presently has no Morrow tests south of Sections 2 and 3.

Mewbourne Oil Company has notified the offset operators and unleased mineral owners of our intention to apply for the unorthodox location drilling permit pursuant to Division 104 (F).

Sincerely,

Mewbourne Oil Company

A handwritten signature in cursive script that reads "David C. Shatzer".

Re: Application for Unorthodox
Location Drilling Permit
Loco Hills State #1 Well
W/2 of Section 2,
T18S, R30E
Eddy County, New Mexico

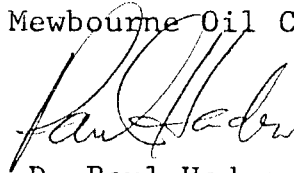

Gentlemen:

Jean A. Eaton, as an offset operator or owner of operating rights, has been advised of Mewbourne Oil Company's intent to drill the above referenced well at a location 660' FWL & 990' FSL of Section 2, T18S, R30E, Eddy County, New Mexico.

This letter is to advise that Jean A. Eaton has no objection to the granting of a permit to drill at this location and hereby waives objection and notice of hearing on this application.

Sincerely,

Mewbourne Oil Company

RE: Application for Unorthodox
Location Drilling Permit
Cedar Lake Morrow Pool
Loco Hills State #1 Well
W/2 of Sec. 2, T18S, R30E,
Eddy County, New Mexico

Ladies and Gentlemen:

Mewbourne proposes to drill a well at a point located 990 feet from the south line and 660 feet from the west line of the above described Section 2 to an approximate depth of 11,700 feet to test all formations from the surface through the base of the Morrow formation.

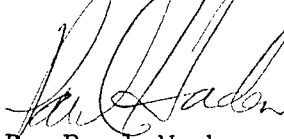

Mewbourne seeks an exception to the well location requirements of Division Rule 104 and has applied, pursuant to Division Rule 104 F(II) for administrative approval of an unorthodox gas well location as described above for all formations through the base of the Morrow formation which may be developed on 320 acre spacing. The W/2 of the above described Section 2 is to be dedicated to the test well.

Mewbourne wishes to drill this well at the proposed location as we feel it is necessary if we are to recover oil and gas reserves underlying our lease. We are also convinced that the distance from the proposed well location to other producing wells is sufficient to insure no harmful effect on other producers.

If you have no objection to the above location, please date and sign the attached Waivers of Objection and return two (2) copies to me in the enclosed self-addressed stamped envelope. Should you have any questions regarding the above or want to discuss this matter further, please call. Your prompt and favorable response will be sincerely appreciated.

Sincerely, .

RE: Application for Unorthodox
Location Drilling Permit
Cedar Lake Morrow Pool
Loco Hills State #1 Well
W/2 of Sec. 2, T18S, R30E,
Eddy County, New Mexico

Ladies and Gentlemen:

Mewbourne proposes to drill a well at a point located 990 feet from the south line and 660 feet from the west line of the above described Section 2 to an approximate depth of 11,700 feet to test all formations from the surface through the base of the Morrow formation.

Mewbourne seeks an exception to the well location requirements of Division Rule 104 and has applied, pursuant to Division Rule 104 F(II) for administrative approval of an unorthodox gas well location as described above for all formations through the base of the Morrow formation which may be developed on 320 acre spacing. The W/2 of the above described Section 2 is to be dedicated to the test well.

Mewbourne wishes to drill this well at the proposed location as we feel it is necessary if we are to recover oil and gas reserves underlying our lease. We are also convinced that the distance from the proposed well location to other producing wells is sufficient to insure no harmful effect on other producers.

If you have no objection to the above location, please date and sign the attached Waivers of Objection and return two (2) copies to me in the enclosed self-addressed stamped envelope. Should you have any questions regarding the above or want to discuss this matter further, please call. Your prompt and favorable response will be sincerely appreciated.

RE: Application for Unorthodox
Location Drilling Permit
Cedar Lake Morrow Pool
Loco Hills State #1 Well
W/2 of Sec. 2, T18S, R30E,
Eddy County, New Mexico

Ladies and Gentlemen:

Mewbourne proposes to drill a well at a point located 990 feet from the south line and 660 feet from the west line of the above described Section 2 to an approximate depth of 11,700 feet to test all formations from the surface through the base of the Morrow formation.

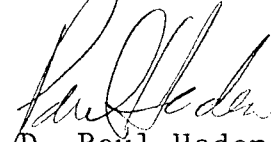

Mewbourne seeks an exception to the well location requirements of Division Rule 104 and has applied, pursuant to Division Rule 104 F(II) for administrative approval of an unorthodox gas well location as described above for all formations through the base of the Morrow formation which may be developed on 320 acre spacing. The W/2 of the above described Section 2 is to be dedicated to the test well.

Mewbourne wishes to drill this well at the proposed location as we feel it is necessary if we are to recover oil and gas reserves underlying our lease. We are also convinced that the distance from the proposed well location to other producing wells is sufficient to insure no harmful effect on other producers.

If you have no objection to the above location, please date and sign the attached Waivers of Objection and return two (2) copies to me in the enclosed self-addressed stamped envelope. Should you have any questions regarding the above or want to discuss this matter further, please call. Your prompt and favorable response will be sincerely appreciated.

Sincerely,:

Mewbourne Oil Company
