Attention: Mr. William J. LeMay - Director

Gentlemen:

Chevron U.S.A. Inc. respectfully requests your approval of our administrative application for the subject Unorthodox Gas Well Location in the Tubb (Prorated Gas) Pool.

Chevron has re-completed it's ~~Mark Owen Well No. 6~~ in the Tubb Oil and Gas Pool and recent tests indicate this well should be a gas well. Therefore, it is necessary to assign a standard 160-acre gas proration unit comprising the SE/4 of Section 34, T-21-S, R-37-E to this well in the Tubb (Prorated) Gas Pool. As a result, the location of the Mark Owen Well No. 6 is unorthodox in that it is less than 660' from the outer boundary of the proration unit. The location of Well No. 6 is 554 feet FSL and 2086 feet FEL of Section 34, T-21-S, R-37-E, NMPM, Lea County, New Mexico.

In order to prevent waste, Chevron respectfully requests your approval of this administrative application for an unorthodox gas well location under the provisions of Rule 104 (F). Attached is a map showing offset operators and a Form C-102. A copy of this letter and attachments are being furnished to the offset operators by Certified Mail, as notice of this application.

If you have any questions or require any further information concerning this application, please contact me at (915) 687-7246.

Yours very truly,
