Re: W. A. Ramsay NCT-A #35-N
Section 27, T21S, R36E
Recompletion from Eumont Injector to Eumont Gas

Gentlemen:

Your intention to recomplete the above-referenced well from Eumont injection well to Eumont gas well as a second well on a 640-acre proration unit shared by #46E was approved February 28, 1991.

I need to point out production from this well as a gas well in the Eumont will not be approved until the non-standard location and simultaneous dedication has been approved by our Santa Fe office. If you have not already submitted your application please do so immediately.

Very truly yours,

OIL CONSERVATION DIVISION
