Attention: Mr. William J. LeMay, Director

Gentlemen:

Phillips Petroleum Company respectfully requests an exception to Rule 7 of the Basin Fruitland Coal Gas Pool Rules for an unorthodox location for the subject well, due to topographical conditions. This request can be approved administratively under the provisions of Rule 8 of the Basin Fruitland Coal Gas Pool Rules.

This is a Federal Lease with the minerals and surface managed by the United States Department of the Interior, Bureau of Land Management, Farmington Resource Area. The staked location was agreed upon by Bill Liess, Surface Inspector, BLM, and Richard Allred, Phillips Petroleum Company employee. The staked location of Well No. 235 is in Unit N, 463' FSL and 1568' FWL of Section 29, T-32-N, R-7-W, San Juan County, New Mexico. Due to topographical (mountainous) conditions we were unable to find suitable terrain and were unable to stake the well at a standard location. There is an existing pipeline within 500' of the location. The 320 acre proration unit is offset by CNG Development Co. to the West.

Attachments to support approval are:

1. Complete APD packet dated 5-22-92, with all necessary attachments.
2. Archaeological report prepared by La Plata Archaeological Consultants.
3. A copy of a portion of the Burnt Mesa Quadrangle topographical map showing Section 29.
4. A certified statement that the information is current and correct.
