Attn: Mr. William J. LeMay
Director

Dear Mr. LeMay:

Chevron U.S.A. is planning to recomplete the **Harry Leonard (NCT-A) #6** in the Eumont YTS-7RVRS-QN (Pro Gas) Pool. The well, which is currently completed in the Eumont Oil (Queen) Pool, is located 660' FSL and 1980' FWL in Section 22, T-21-S, R-36-E, Lea County, New Mexico.

The subject well is located on an existing non-standard 480-acre Eumont Gas Spacing and Proration Unit (GPU) which comprises the E/2 and SW/4 of Section 22 according to Administrative Order NSP-944 dated April 12, 1974, and Division Order R-5549 dated October 25, 1977. Four wells on the aforementioned GPU, the Harry Leonard (NCT-A) Nos. 3, 7, 12 and 13, are currently dedicated to the unit. We respectfully request that the production from the **Harry Leonard (NCT-A) #6** be simultaneously dedicated to the aforementioned GPU with these four wells.

Because the subject well is located less than 990' from the boundary of the said 480-acre GPU, we also request your approval for an unorthodox well location.
