

# 2006 MONITORING REPORTS

The map displays a central building complex with various monitoring wells (MW) and infiltration wells (IW) located around it. The map includes a grid of streets, a north arrow, and a scale bar. The central building complex is labeled with various MW numbers and elevations. Surrounding areas also show numerous MW and IW locations with their respective elevations. A legend at the bottom right explains the symbols used.

**Legend:**

- MW (Monitoring Well)
- IW (Infiltration Well)
- EPWW (Effluent Pumping Well)
- OPWW (On-Pipe Well)
- OP (On-Pipe)
- OPW (On-Pipe Well)
- OPW2 (On-Pipe Well 2)
- OPW3 (On-Pipe Well 3)

The map displays the study area with several monitoring wells and groundwater elevation contours. The wells are labeled as follows:

- MW046** (purple circle): Groundwater Elevation (ft AMSL) is 3374.04\*. It is located near the top left of the map.
- RW002** (green circle): Recovery Well Location. It is located near the top center of the map.
- IW006** (green circle): Injection Well Location. It is located near the top center of the map, below RW002.
- ROWLANDWW** (purple circle): Water Supply Well Location. It is located near the bottom left of the map.

Groundwater Elevation Contours (ft AMSL) are shown as dashed lines:

- 3381**: A contour line near the bottom left, passing near ROWLANDWW.
- 3380**: A contour line near the bottom center.
- 3379**: A contour line near the bottom right.
- 3378**: A contour line near the bottom right, passing near the bottom of the map.

A legend in the top right corner identifies the symbols:

- Explosion**: Represented by a yellow starburst symbol.
- Monitoring Well Location**: Represented by a green circle.
- Groundwater Elevation (ft AMSL)**: Represented by a purple circle.
- (\* Groundwater Elevations Not Used in Contouring)**: A note indicating that elevations for MW046 and RW002 are not used for contouring.
