Subject: RE: Formal Closure Request- NMOCD #: 1R0427-91

Dear Ms. Pope:

The New Mexico Oil Conservation Division (NMOCD) received the closure report for the EME SWD Bertha Barber E-5 Junction Box site, dated May 15, 2007, and conducted a review of the report. The closure report, submitted for the above reference site, which indicated that the Rice Operating Company has met the closure requirements. Therefore, the NMOCD terminated the Remediation Plan (1R0427-91) (on August 16, 2007).

In addition, the NMOCD has received the groundwater monitoring well plugging report for this site in a timely manner. The NMOCD has reviewed the plugging report and hereby concludes that all requirements and conditions for the Remediation Plan (1R0427-91) have been met; and therefore, deems the Remediation Plan (1R0427-91) formally closed.

Please be advised that NMOCD approval of this report does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.

Edward J. Hansen

Subject: Formal Closure Request- NMOCD #s: AP-50, 1R0427-91, 1R042637

Gentleman,

We are writing on behalf of Rice Operating Company to request formal closure of the following sites:

Zachary Hinton EOL Junction Box Site, AP-50
Bertha Barber E-5 Site, 1R0427-91
Junction Box N-29 Site, 1R042637

As you may recall, the monitoring wells at these sites were plugged and abandoned on September 11, 2007 with NMOCD approval. The attached monitoring well plugging reports along with associated

3/20/2008

forms were sent to NMOCD on October 18, 2007. We respectfully request written confirmation of the formal closure of these sites.

Best regards,

Katie Lee
