Re: New Standard Location Approval

Dear Sir:

It is requested that administrative approval be granted under Rule 104F. (1) for unorthodox location for the infill producing well located within the Keel West Waterflood Project, at the following location:

WELL	LOCATION
J. L. Keel A #19Y	1368' FSL & 1367' FEL, Sec. 7-17S-31E

Attached is a plat of the Keel - West Waterflood Project showing the project boundaries that are adjacent to the subject well. Forms 3160 - 3 and C - 102 are attached for the well listed above. The Keel - West Waterflood project is located on federal property and the proposed well is to be part of this active waterflood project.

The above location does not conform to Rule 104. C. I. because it is located closer than 330' to the governmental quarter - quarter section boundaries. It will be drilled to a depth sufficient to produce the Grayburg - San Andres formation (approximately 4000'). The well will be drilled at the unorthodox location in order to prevent waste by developing an efficient production and injection pattern within the Keel - West Waterflood Project, which was approved under Order R - 2268. When fully developed this well will combine with the existing wells (some of which will eventually be converted to injection) to establish a 40 acre 5 spot waterflood pattern.

There are no operators that have production in offsetting 40 acre tracts. The well listed is offset by wells that are already operated by Devon Energy Operating Corporation; therefore, no notification is necessary.

Should you require any additional information regarding this unorthodox locations please notify me at 405-552-4527.

Sincerely,

A handwritten signature in cursive script that reads "Karen Byers".
