If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
. There was a hole in the 2" nipple on top of the tank, on the fill line. This is an active location. The area affected was inside the berms approx. 30' x 15' x 1" in depth. All fluids remained on location. None was reported outside of the location. All standing fluids were removed and taken to an approved disposal.

Describe Area Affected and Cleanup Action Taken.*
. Proposed cleanup includes removing all soil that is discolored, disposed of properly at an approved disposal, line inside the berms with a 20mil liner, and the area backfilled with clean material.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
