VII. Data on Proposed Operation

1. Anticipated average daily injection rate into the Big Bertha 1-11 is 2,000 BWIPD with a maximum daily expected rate of 1,500 BWPD.
2. The system will be a closed system.
3. The average injection pressure will be 1,500 psi and the maximum will be 2,000 psi.
4. The injected fluid will be from the Wolfcamp, which is produced water from nearby well, SV Chipshot 1, that is to be re-injected for disposal.
5. The proposed disposal zone is the Wolfcamp. This produced water that is to be disposed is also from the Wolfcamp, which is the same as the disposal zone. The presence of an aquifer indicates that it should not be a problem to dispose in this well.

VIII. Geologic Data

The top of the Wolfcamp in the Big Bertha 1-11 is 9,830' and is a shelf margin carbonate bank which has been dolomitized. The overall thickness is approximately 90' and the proposed injection intervals look non-productive and water bearing on the logs.

IX. This well will be acidized with 15% HCl and ball sealers for diversion.

X. The openhole logs are on file with the NMOCD.

XI. A search reveals that there are two freshwater wells near the Big Bertha 1-11. They are City Well MW-2, located southwest of the Big Bertha 1-11 and the Caprock Office well, which is located northwest of the Big Bertha 1-11. Water samples are attached for your review.

XII. The available geologic and engineering data has been reviewed and there is not evidence of open faults or any hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Please see the attached information regarding the Proof of Notice section.

Subject: RE: Big Bertha

Hi Will,

(4) Wells are in the process (as I type this e mail) of being sold.

(3) Wells should not be on the list as I have e mailed the Hobbs (OCD office) several times requesting that they be taken off. I don't want to irritate the Hobbs office, but we need them taken off the list.

(1) well (in District II) is to have a MIT ran and it will gives us 6 months to either plug the well or bring back into production.

So if all goes well, be will be down to 10"!!!!

Anyway, thanks for having the Big Bertha permit ready, less our non-compliance with rule 40.

Visit w/ you later,

Hey Bryan:

I have the permit ready to release but Rule 40, inactive wells is too high.

Will you let me know by email when the number drops below 11 wells and I can release?

Take it easy, DUDE

Hi Will,

After your review, can you give me a call and visit with me and/or Charlie?
Is this something that would not have to go through another lengthily process of review by yourself per Charlie's reasoning's below?
Is it ever going to rain in SE New Mexico? I visit quite often with the Hobbs and Artesia OCD staff and they need water.

Subject: Big Bertha 1-11 SWD

Bryan,

The Big Bertha 1-11 is a well that was converted to SWD in February 2008. The approved order number is SWD-671-B and was approved on February 5, 2008. The current injection interval is from 9,830' - 10,118' and the max pressure is 1,966 psi. The well has had some difficulty in disposing of all the fluid that we need - only 500-600 BWPD as opposed to the 1,200 BWPD that would be required. I would like to increase the injection interval to be 9,830' - 10,530'. This lower interval to be added would still be in the Wolfcamp and is already open in a nearby SWD, the Hudgens 1 SWD, which is located in the same section (Sec 6, T-16S, R-36E). The Hudgens 1 SWD is permitted as per order SWD-671, which is in the interval 9,754' - 10,644' and a max pressure of 1,951 psi. I have attached an amended permit for the Big Bertha 1-11, which reflects the new, expanded interval. The only pieces of information missing would be the "Proof of Notice" section, which would include the newspaper notification and the surface owner and offset operator notifications. Can you call and discuss this with Will Jones at the NM OCD? Is there any way to "fast-track" the approval of the expanded interval due to the Hudgens 1 SWD already having it open? Let me know if you have any questions. Thanks.

Hello Bryan:

This looks pretty simple, but technically the way you have started this is the way to go:

You have sent the beginnings of a C-108 amendment. I looked over the last application and have these requests or questions:

- 1) Is the Hudgens well still injecting? I was told earlier that the Big Bertha was a replacement.
- 2) Does Mr. Leeton and Chesapeake have ALL the acreage leased within 1/2 mile of this well covering the Wolfcamp? (Landman should answer this).
- 3) Provide notice to the surface owner and to Mr. Leeton as before.
- 4) Do you agree that extending the injection interval to 10,530 is still in the Wolfcamp?
- 5) Is Chesapeake's Rule 40 (inactive wells and financial assurance) all OK now?

It seems interesting to me that having an offset well injecting for years in this same interval and Chesapeake applies for the Big Bertha and leaves out the bottom portion of this interval for some reason, then determines that this bottom portion is the best place to inject - and now wants to revise and inject there.

- - Why was this interval left out before? Is there any concern about affecting nearby gas or oil production in this well or offset wells?

Sorry to be picky with the questions, but I think this will cover any concerns I have.

The answers to the questions are in red below:

- 1) Is the Hudgens well still injecting? I was told earlier that the Big Bertha was a replacement.
The Hudgens 1 SWD is still injecting at 350 BWPD. It is still going because the Big Bertha 1-11 did not inject at the volumes we expected.
- 2) Does Mr. Leeton and Chesapeake have ALL the acreage leased within 1/2 mile of this well covering the Wolfcamp?
(Landman should answer this).
Will Charlie noted the following:
CHK and Mr. Leeton are only sole lessees within the S2NW of 11-16S-36E (the original spacing unit).
There are others who will need to be notified within the 1/2 mile.
- 3) Provide notice to the surface owner and to Mr. Leeton as before.
This will be done.
- 4) Do you agree that extending the injection interval to 10,530 is still in the Wolfcamp?
Yes, the extension is still in the Wolfcamp.
- 5) Is Chesapeake's Rule 40 (inactive wells and financial assurance) all OK now?
As you are aware, paperwork has been filed that should get us back to good.

It seems interesting to me that having an offset well injecting for years in this same interval and Chesapeake applies for the Big Bertha and leaves out the bottom portion of this interval for some reason, then determines that this bottom portion is the best place to inject - and now wants to revise and inject there.

- - Why was this interval left out before? Is there any concern about affecting nearby gas or oil production in this well or offset wells?

5/8/2008

There is no good reason as to why the interval was left out in the previous application. The zone was below a plug already and it was thought to be a much faster completion by leaving out that interval would be my guess. I don't have any concerns about affecting oil or gas production in offset wells as the offset producers are already high water producers and therefore there a large aquifer is present.

Hope that answers your questions. I will let you know as soon as the land issues have been resolved. Thanks.

Charlie

Hi Will,

I'm ready to send to you the application (C-108 and all that goes with it) for the Big Bertha 1-11.

I have the complete application along with 2 notices to the newspapers in SE New Mexico in Hobbs and Lovington.

I have sent to the SLO a copy of the application also.

Pete Martinez w/the SLO informed me that as this well was on Fee minerals they really didn't need it nor would they would oppose it.

However a copy of the application would be nice for them to have as it may be close to State Lands.

I mailed that today by UPS, however it was not certified as I did not see it in the rules.

That was what I needed to know.

As for the notifications, we made copies of the U.S. Postal Service

"CERTIFIED MAILtm Receipt" cards delivered on 6/2/2008.

The green cards (hundreds of them) have started to come back in batches.

I was going to wait a few more days to try and get all of them.

I just want to be sure all the tees are xd and the eyes

Anyway if you get a chance please give me a call.

Thanks,
