Subject: Tank Cleaning Forms C-117A

Dear Mr. Hansen:

Per our telephone conversation this morning regarding the C-117A forms, submitted on September 3, 2008, for tank cleaning at the Thriftway Refinery, all waste materials will be transported out of the facility and to the recycling or disposal facility by Inland Corporation, Bloomfield, New Mexico. However, there may be an occurrence where some waste, such as refined gasoline, would be transported by Safety Kleen (if this waste is to be recycled at the Safety Kleen facility in Farmington, New Mexico).

Thank you for your assistance.

Ross Kennemer

Project Manager

RE: Demolition Plan and Notification of Storage Tank Cleaning for the Thriftway Refinery, 626 County Road 5500, Bloomfield, San Juan County, New Mexico

Dear Mr. Hansen:

Animas Environmental Services, LLC (AES), on behalf of Thriftway Company (Thriftway) submits this Demolition Plan and Notification of Storage Tank Cleaning for the Thriftway Refinery (site), located at 626 County Road 5500, Bloomfield, San Juan County, New Mexico. The sites legal description is: SE1/4 Section 32; SW1/2, SW1/4, Section 33, T29N, R11W and NE1/4, NE1/4, Section 9, T28N, R11W.

1.0 Site History

Based on a review of Thriftway records, refinery operations began in 1972 and ceased operations in the spring of 1992. Shortly thereafter, Thriftway entered into a lease agreement with Giant Industries (Giant) allowing Giant to use the Lease Tanks for the storage of Giant's unrefined crude oil. None of Giant's crude oil was refined or otherwise utilized at the site. Rather, the site was simply a storage facility for Giant's excess crude inventory.

Further review of the archived files indicates that in preparation of the lease of the tanks to Giant, Thriftway undertook to clean and inspect the Lease Tanks. This process began in the summer of 1992 and appears to have been completed sometime in 1993. Tanks were cleaned and tank floors were inspected and vacuum tested. Upon completion of the inspection process, the tanks were turned over to Giant for their product storage. Since that time, Giant has stored unrefined crude oil in Tank Nos. 11, 12, 13, 14, 17, 18, 19, and 21. (See attached Figure for tank locations)

Within the past few months, Thriftway and Giant have negotiated a termination of the lease agreement such that Thriftway can commence with the dismantling of the refinery site. As an initial measure, Thriftway's contractors will remove all residual oil from the storage tanks and transfer piping utilized by Giant, as well as all other product tanks, waste sumps, and waste sump collection tanks, to allow proper cleaning.

2.0 Storage Tank Cleaning

Thriftway will contract with Inland Corporation (Inland), Bloomfield, New Mexico, to remove all oil from the Lease tanks utilizing a combination of hot-oil and vacuum trucks. Inland will transport all oil to D&D Oil Recycling, Bloomfield, New Mexico (ID #NMD986682102) where it will be blended and used as burner fuel.

Two tanks (Tank 22 and 39) at the refinery, which were not part of the Giant Lease Tanks, are known to contain finished fuel products, including gasoline and diesel. Finished fuel products will be transported by Inland to Western Refinery, Bloomfield, New Mexico, if Western Refining (formerly Giant) will accept this material to blend with their refinery stock. Otherwise, the product will be collected by Safety Kleen, Farmington, New Mexico, for recycling.

Oily waste water will be transported by Inland to the Envirotech Disposal Facility, located south of Bloomfield, New Mexico. Waste water that does not contain floating oil will be allowed to evaporate at the site's waste water evaporation ponds.

All waste streams will be sampled in accordance with the proposed disposal facilities requirements prior to being transported from the site, and written acceptance of the waste by the disposal facility will be obtained.

Once emptied, each tank will be steam cleaned by Riley Industrial Services, Farmington, New Mexico, with the effluent being disposed of at the site through the process waste water treatment system and evaporation ponds, or at Envirotech or another permitted disposal facility based on respective acceptance criteria.

If a spill of oil were to occur during tank cleaning, the contractor will take immediate steps to contain the spill and recover as much free oil as possible. Spill notifications will be made pursuant to NMOCD Regulations.

The following is a list of all refinery tanks and their current contents based on an inspection completed by Thriftway and AES on August 25, 2008.

Table 1. Tank Inventory
Thriftway Refinery, 626 County Road 5500, Bloomfield, New Mexico

Tank ID	Tank Size (BBLs)	Contents	Proposed Waste Disposal Location
11	56,000	700 bbls. semi-solid crude oil	D&D Oil Recycling
12	56,000	2,000 bbls. semi-solid crude oil	D&D Oil Recycling
13	21,000	500 bbls. semi-solid crude oil	D&D Oil Recycling
14	21,000	500 bbls. semi-solid crude oil	D&D Oil Recycling
17	11,000	200 bbls. semi-solid crude oil	D&D Oil Recycling

Tank ID	Tank Size (BBLs)	Contents	Proposed Waste Disposal Location
18	11,000	200 bbls. semi-solid crude oil	D&D Oil Recycling
19	13,000	250 bbls. semi-solid crude oil	D&D Oil Recycling
21	10,000	240 bbls. semi-solid crude oil	D&D Oil Recycling
30	13,000	250 bbls. semi-solid crude oil	D&D Oil Recycling
20		Empty	NA
37		Empty	NA
37		Empty	NA
39	100	3 bbls. diesel fuel	Safety Kleen or Western Refining
22	5,000	350 bbls. gasoline	Safety Kleen or Western Refining
23	5,000	Empty	NA
25	1,000	Empty	NA
27	1,000	Empty	NA
28	1,000	Empty	NA
29	1,000	Empty	NA
31	10,000	Empty	NA
Load/unload spill collection tank	240	240 bbls. rainwater	On site at evaporation ponds. If oil is present, dispose of at Envirotech Landfarm.
Tank 12 Water drain tank	150	150 bbls. rainwater	On site at evaporation ponds. If oil is present, dispose of at Envirotech Landfarm.
Tank 13 Water drain tank	150	150 bbls. rainwater	On site at evaporation ponds. If oil is present, dispose of at Envirotech Landfarm.
Residual fuel loading rack spill collection tank	240	240 bbls. rainwater	On site at evaporation ponds. If oil is present, dispose of at Envirotech Landfarm.
Crude Unit Process Oil Collection Tank	240	240 bbls. rainwater	On site at evaporation ponds. If oil is present, dispose of at Envirotech Landfarm.
Process Water System Tank A	250	12 bbls. oily water	Envirotech Landfarm
Process Water System Tank B	250	12 bbls. oily water	Envirotech Landfarm

3.0 Storage Tank Demolition

Thriftway is currently in the process of selecting a demolition contractor to dismantle the site storage tanks. Due to the size and age of most of the tanks, it is likely that most tanks will be recycled as scrap metal.

4.0 Refinery Process Equipment Dismantling/Demolition

The following refinery equipment has been sold by Thriftway to Midwest Equipment, LLC, who will oversee the dismantling. Midwest Equipment, LLC, has since sold the refinery equipment (still located at the Thriftway Refinery) to Omega Refining, Inc., where it will eventually be used at operating refineries. Equipment sold includes:

1. Crude Unit 6,000 BPD
2. C/W Flare System and Pre-Stripper
3. Hydrocracker Unit 1,000 BPD
4. Desulfurization and Reformer Unit 2,000 BPD

Any other ancillary equipment, such as engines, compressors, piping, electrical controls, and electrical wiring, not included in the above list of refinery equipment will be sold as usable equipment to another contractor. If the equipment is determined to be unusable, it will be sold as scrap. All materials will be manifested as to its disposition.

5.0 Hazardous Waste

It is not anticipated that any hazardous waste will be generated during the demolition project. However, if any wastes generated are determined to be hazardous (as defined by the United States Environmental Protection Agency (USEPA) or the New Mexico Environment Department (NMED) regulations), this waste will be properly transported and disposed of at an approved off-site hazardous waste disposal facility.

6.0 Special Waste

Insulation – All insulation will be analyzed for the presence of asbestos containing material (ACM). Any ACM will be removed by qualified contractors and disposed of at an approved ACM landfill. Non-asbestos insulation will be disposed of as solid waste at the San Juan County Landfill.

Used Oil – All used oil will be containerized and transported off-site for recycling at D&D Oil Recycling. If a spill of waste oil were to occur during collection, the contractor will take immediate steps to contain the spill and recover as much free oil as possible. Spill notifications will be made pursuant to NMOCD Regulations.

Used Antifreeze - All glycol based coolants will be containerized and transported off-site for recycling at an approved facility. If a spill of antifreeze were to occur during

collection, the contractor will take immediate steps to contain the spill and recover as much free liquid as possible. Spill notifications will be made pursuant to NMOCD Regulations.

Hydrocarbon Contaminated Soil and Groundwater – The Thriftway Refinery is known to have both soil and groundwater which have been impacted by hydrocarbons. A comprehensive sampling and analysis plan, followed by a corrective action plan, will be submitted to the NMOCD within six months.

Building and Process Equipment Foundations – All concrete will be removed and transported off-site to be recycled as road or stabilization material.

General Demolition Debris – All non-degradable inert waste (rocks, concrete, etc.) generated during demolition activities will be transported off-site to be recycled. All degradable waste (scrap lumber, roofing, siding, vegetation, etc.) will be transported off-site and disposed of at the San Juan County Landfill.

Evaporation Ponds – The process waste water treatment system, which included two lined evaporation ponds, is not included in this demolition plan. These systems will be utilized during site remediation, and their final closure will be addressed in the corrective action plan.

7.0 Deliverables

Upon completion of all refinery closure activities, a closure report will be submitted to the NMOCD for approval. However, due to the known extent of soil and groundwater contamination beneath the site, a sampling and analysis plan and a corrective action plan will be submitted and implemented, and once corrective action activities are complete, a site closure report will be prepared and submitted to NMOCD.

8.0 Schedule

Thriftway's contractors will begin the tank cleaning work in late September 2008, followed by the dismantling of the refinery equipment.

If you have any questions or comments, please do not hesitate to contact me at (505) 564-2281.

Sincerely,

Ross Kennemer
Project Manager
