Re: Administrative approval request for unorthodox location  
Roddy Production Inc Yockey #7, 30-045-34149 Basin Fruitland Coal Well  
517' FWL & 761' FNL Section 20, T27N & R11W

Dear Mr. Brooks,

Roddy Production Inc respectfully requests that a non-standard location be approved for the Yockey #7.

The well is a development coal well located on Federal minerals and NAPI surface. In order to fully develop the coal potential in section 20, this additional development well is needed. However, the required surface to drill a well in the NW/4 of section 20 is limited by existing crop circles, irrigation lines, and power lines. After many discussions and onsite meetings with NAPI, the best location was determined to be 517' from the lease line. A BIA Environmental Assessment and Archeological and Historical clearance have both been performed and an approved APD for that location has been granted.

To comply with New Mexico Oil Conservation Rules, Roddy Production Inc is submitting the following data for your approval of this unorthodox location:

1. Copy of Notice of Staking to BLM
2. Copy of C-102
3. Land plat showing offset operators and offsetting wells producing from the Basin Fruitland Coal Gas Pool
4. Copy of Topographic Map with NAPI Farm Circles

In accordance with New Mexico Oil Conservation Rules, all offset Fruitland Coal operators are being notified of this application by certified mail.

If additional information is needed, please feel free to contact me.

Dear Mr. Dunn

I have reviewed this application.

The proposed location encroaches to the west, *i.e.* toward Section 19. According to your well plat, the only Fruitland Coal wells in Section 19 are the two Four Star wells in the S/2. As best I can tell from the well files, both of these wells appear to be dedicated to a S/2 unit. Thus there is no division-designated operator in the N/2 of Section 19, and notice of this application is required to working interest owners.

Please advise us concerning working interest ownership in the N/2 of Section 19, and whether all working interest owners in the half section have been notified of this application. If there are additional working interest owners who have not been notified, additional notice will be required.

Thanks

Dear Mr. Dunn

The answer is "yes," you do need to research the title. Under Rule 1210, if there is no operator for an offsetting spacing unit, notice must be given to "lessees." We interpret that to mean working interest owners, since there would be no point in notifying the original lessee if someone else owns the working interest.

Thanks

There have been no Fruitland Coal wells drilled in the N/2 of section 19. There are two Dakota wells operated by PRO Management Inc & Fuller Production Inc. Do we need to go research the title and see who has that leased?  
Thanks.

Roddy Production Inc; Yockey #7, 30-045-34149 Basin Fruitland Coal Well  
517' FWL & 761' FNL Section 20, T27N & R11W

Dear Mr. Brooks,

After researching the title of section 19 offsetting section 20 where the subject well is located, we determined there were three owners. Two owners have been notified by certified return receipt requested mail. The third (WM Fuller) was returned and could not be forwarded from the last available address. An attempt was made to contact the secretary of Fuller Petroleum, and he indicated that the company has been inactive for over ten years and he had not worked for that company in at least that time frame. There have been no additional public filings that indicate this interest was ever transferred.

A copy of the certificates of receipt have been included for the notice of a non-standard location that were sent to Dugan Production and Pevehouse Oil as well as the return to sender not deliverable as sent to Fuller Production. Please contact me if you need anything else.
