**Re: Enterprise Field Services LLC- Texaco Bilbrey Compressor Station
Discharge Plan GW-265**

Dear Mr. Griswold:

This submittal is in response to a letter dated September 15, 2008 from the New Mexico Oil Conservation Commission (NMOCD). The NMOCD requested that Enterprise Field Services LLC (Enterprise) remove concrete and remaining conduit from the site before final closure would be granted. This is to inform you that the concrete slab and conduit have been removed and disposed of at Lea Land facility in Carlsbad, NM.

Attached you will find photographs taken on October 18, 2008. These photographs reflect the NMOCD requested activity of concrete and conduit removal. Enterprise requests closure of the Texaco Bilbrey Compressor Station.

If you have questions or require additional information, please contact Jennifer Corser, Field Environmental Scientist at (432) 230-1414 or me directly at (713) 880-6518.

Yours truly,

Mary E. Hebert
Director, Environmental Compliance
