San Juan County, New Mexico**

RECEIVED

OCT 24 2003

Oil Conservation Division

Reference is made to your letter of October 17, 2003, concerning our proposed production allocation method. In our application of September 22, 2003, BP America Production Company proposed to allocate production from each pool based actual production (a fixed percentage). Please note that it is our intent to install individual allocation meters to measure the production for each well. The production from each well will be metered prior to commingling. Attached is a corrected schematic indicating the facility and metering configuration.

Corrected notice of this application is being furnished to all interest owners via certified mail return receipt requested.

Should you have any questions concerning this matter please contact me at 281-366-4491.

Yours very truly

A handwritten signature in cursive script that reads "Mary Corley".
