RE:

Form C-107A

Norte 19 Fed Com #1 Completion & Commingle

To Whom It May Concern:

Please find enclosed the following for the application to downhole commingle production from the Gem Morrow & Undesignated Atoka gas pools in the referenced well:

Form C107A Attachments information Form C-102 for both zones Administrative Application Checklist

A copy of Form C-107A is being mailed today to the Bureau of Land Management in Carlsbad.

Mewbourne Oil Company would appreciate this commingle request being processed as soon as possible. If you need further information, please call me at (575) 390-4816.

Thank you,

Robin Terrell SR Production Engineer

### Attachments to C-107A

- 1. C102 for each zone to be commingled showing its spacing unit & acreage dedication.
- 2. Production is estimated for both zones.

Gem Morrow (Estimated production 500 MCF 10 BO, 0 BW) Undesignated Atoka (estimated 500 MCF, 0 BO, 0 BW)

3. Notification list of working, royalty and overriding royalty interests for uncommon interest cases.

No uncommon interests.

4. Additional statements and data to support commingle.

The well is completed with 5 ½" OD casing. In order to dually complete the well to recover all economic reserves, the use of small diameter special clearance tubing would be required. Performing a dual completion as described could not be economically justified for a zone with limited deliverability. To produce the Atoka interval (upper zone) up the annulus (5 ½" - 2 ¾") is not recommended due to liquid loading and insufficient velocity to lift produced fluids with the estimated gas rates listed above. The addition of the Atoka as a commingled zone will prevent waste that would not otherwise be possible due to the increased cost to produce each individual zone. Commingling will prevent early abandonment of each productive zone.
